Malik, 1995 A text for a two semester electronics sequence for majors in electrical engineering serving the special needs of computer engineers by allowing readers to advance to digital topics and skip linear applications Assumes prior knowledge of circuit theory Laplace transforms and transfer functions and ideal logic gates Covers instrumentation oriented topics emphasizing operational amplifiers and integrates SPICE modeling throughout the text Includes summaries problems and b w illustrations Annotation c Book News Inc Portland OR booknews com FET Modeling for Circuit Simulation Dileep A. Divekar, 2012-12-06 Circuit simulation is widely used for the design of circuits both discrete and integrated Device modeling is an important aspect of circuit simulation since it is the link between the physical device and the simulated device Currently available circuit simulation programs provide a variety of built in models Many circuit designers use these built in models whereas some incorporate new models in the circuit simulation programs Understanding device modeling with particular emphasis on circuit simulation will be helpful in utilizing the built in models more efficiently as well as in implementing new models SPICE is used as a vehicle since it is the most widely used circuit simulation program However some issues are addressed which are not directly applicable to SPICE but are applicable to circuit simulation in general These discussions are useful for modifying SPICE and for understanding other simulation programs The generic version 2G 6 is used as a reference for SPICE although numerous different versions exist with different modifications This book describes field effect transistor models commonly used in a variety of circuit simulation programs Understanding of the basic device physics and some familiarity with device modeling is assumed Derivation of the model equations is not included SPICE is a circuit simulation program available from EECS Industrial Support Office 461 Cory Hall University of California Berkeley CA 94720 Acknowledgements I wish to express my gratitude to Valid Logic Systems Inc
