Anthropology's Global Histories Rainer F. Buschmann, 2008-10-31 Anthropologists and world historians make strange bedfellows Although the latter frequently employ anthropological methods in their descriptions of cross cultural exchanges the former have raised substantial reservations about global approaches to history Fearing loss of specificity anthropologists object to the effacing qualities of techniques employed by world historians this despite the fact that anthropology itself was a global comparative enterprise in the nineteenth century Rainer Buschmann here seeks to recover some of anthropology's global flavor by viewing its history in Oceania through the notion of the ethnographic frontier the furthestmost limits of the anthropologically known regions of the Pacific The colony of German New Guinea 1884-1914 presents an ideal example of just such a contact zone Colonial administrators there were drawn to approaches partially inspired by anthropology Anthropologists and museum officials exploited this interest by preparing large scale expeditions to German New Guinea Buschmann explores the resulting interactions between German colonial officials resident ethnographic collectors and indigenous peoples arguing that all were instrumental in the formation of anthropological theory He shows how changes in collecting aims and methods helped shift ethnographic study away from its focus on material artifacts to a broader consideration of indigenous culture He also shows how ethnological collecting often a competitive affair could become politicized and connect to national concerns Finally he places the German experience in the broader context of Euro American anthropology *Anthropology's Global Histories* will interest students and scholars of anthropology history world history and Pacific studies The American Robert Ellis Thompson, Wharton Barker, 1884 Nutrition Abstracts and Reviews, 2006 **Psychotherapy for the Advanced Practice Psychiatric Nurse - E-Book** Kathleen Wheeler, 2007-11-06 *Psychotherapy for the Advanced Practice Psychiatric Nurse* provides the nurse psychotherapist with a useful how to primer that contains practical techniques and interventions without a lot of theoretical jargon Topics include the basics of psychotherapy from how to respond to a patient's initial call to termination of care Selected approaches interpersonal cognitive behavioral and psychodynamic psychotherapy are highlighted with discussion of evidence base research Specific techniques for working with commonly seen patient populations that require special consideration those who have experienced trauma children and older adults are included In addition how to integrate psychopharmacology and psychotherapy is discussed in detail A straightforward approach to psychotherapy using a holistic nursing framework Latest findings on the neurophysiology of psychotherapy including research on attachment therapeutic relationships and trauma Evidence based research for all approaches and populations discussed Provides treatment hierarchy for decision making in selecting strategies for treatment from the initial contact and assessment to termination Step by step guide to building the nurse patient relationship in order to achieve quality outcomes Includes detailed instructions on therapeutic communication techniques Detailed instructions teach you how to use the latest therapeutic communication techniques Includes all patient
