volume contains the proceedings of the 11th conference on mathrm AGC 2 T held in Marseille France in November 2007 There are 12 original research articles covering asymptotic properties of global fields arithmetic properties of curves and higher dimensional varieties and applications to codes and cryptography This volume also contains a survey article on applications of finite fields by J P Serre mathrm AGC 2 T conferences take place in Marseille France every 2 years These

international conferences have been a major event in the area of applied arithmetic geometry for more than 20 years    [My Mathematical Universe: People, Personalities, And The Profession](#) Krishnaswami Alladi,2022-11-15 This is an autobiography

and an exposition on the contributions and personalities of many of the leading researchers in mathematics and physics with whom Dr Krishna Alladi Professor of Mathematics at the University of Florida has had personal interaction with for over six decades Discussions of various aspects of the physics and mathematics academic professions are included Part I begins with

the author s unusual and frequent introductions as a young boy to scientific luminaries like Nobel Laureates Niels Bohr Murray Gell Mann and Richard Feynman in the company of his father the scientist Alladi Ramakrishnan Also in Part I is an exciting account of how the author started his research investigations in number theory as an undergraduate and how

contact and collaboration with the great Paul Erd s as a student influenced him in his career In depth views of the Institute for Advanced Study Princeton and several major American Universities are given and fascinating descriptions of the work and personalities of some Field Medalists and eminent mathematicians are provided Part II deals with the author s tenure at

the University of Florida where he initiated several programs as Mathematics Chair for a decade and how he has served the profession in various capacities most notably as Chair of the SASTRA Ramanujan Prize Committee and Editor in Chief of The Ramanujan Journal The book would appeal to academicians and the general public since the author has blended academic and scientific discussions at a non technical level with descriptions of destinations in his international travels for work and pleasure The reader is invited to dig as deep as desired and is guaranteed to be treated to whimsical stories and personal peeks at some of the great luminaries of the twentieth and twenty first centuries    [Variations on a Theorem of Tate](#)
