All Kcse Papers From 2021:

The Education Alibi Elizabeth Cooper, Erdmute Alber, Wandia Njoya, 2025-10-22 Education is generally promoted as the key to the future of Africa in global development discourses about the continent Education's official story in Africa continues to be one of innocence and public good yet since colonial times education has constituted an area of intense contestation. The Education Alibi asks if it is possible that while claiming to be doing one thing education has also been doing another in African communities. The concept of the alibi shines an interrogative light on institutions and actors' use of education to divert scrutiny from other effects. Through ethnographic research and critical analysis across the continent this volume focuses on people's lived experiences to demonstrate how contemporary education systems in fact deepen economic racialized gendered urban rural linguistic religious and other intranational and international inequalities.

Language and the Knowledge Economy Josep Soler, Kathrin Kaufhold, 2025-02-28 This volume offers a holistic understanding of the interconnections of language specifically English scholarly publishing and knowledge production and circulation through a sociolinguistic lens in contemporary academia across different European settings for research purposes. The volume is organised around three parts the first part explores individual factors underpinning knowledge production and their role in shaping scholars academic careers the second part critically reflects on the challenges and opportunities for multilingual scholars in the academic landscape examining the inherent tensions in the interactions between English and other languages the final part considers the ways in which academic knowledge is institutionalised at universities private companies and on a national scale and the subsequent impact on knowledge dissemination. Taken together the chapters provide a coherent and holistic overview of the affordances and limitations that different social actors experience when participating in such cycles including the different modes of access to resources across geographic contexts and disciplinary traditions. An important contribution of the volume is the multilayered angle that it incorporates into analysing issues of scholarly publishing in today's academia placing language as a social practice at the heart of the structuring processes that condition the creation dissemination and consumption of knowledge in contemporary societies. This book will be of interest to scholars in English for research and publication purposes sociolinguistics language and education and applied linguistics.
