**Agriculture Sector Transformation in Nepal** Dinesh Panday, Prabhat Khanal, Bishnu Raj Upreti, Jagadish Timsina, 2025-09-26 This book addresses the significant challenges faced by Nepal's agriculture sector including political changes, regional geopolitical interests, technical inadequacies, and poor governance. Comprehensive sectoral restructuring, political commitment, new institutional and legal frameworks, and governance reforms are essential while carefully navigating regional geopolitical complexities. The book provides a roadmap for restructuring Nepal's agriculture sector with scientifically robust chapters that address policy and climate change issues and align with national policies. It serves as a blueprint for tackling food insecurity in developing countries, particularly in South Asia, facing similar research policy and geopolitical challenges.

**Plasticulture Engineering and Technology** Rohitashw Kumar, Vijay P. Singh, 2022-05-05 The utilization of successful plasticulture engineering technology can ideally optimize crop yields and provide both economic and environmental benefits such as reducing the need for water and fertilizer. This book discusses the myriad important aspects of crop production that utilize plastic such as micro irrigation, water management, plastic mulch, films, protected cultivation, and low tunnels. Crop covers, canal linings, silage bags, and more. It also examines the latest methods for vertical farming and technological aspects such as smart agriculture using the Internet of Things (IoT). The current state of the art as well as potential future uses of plastics is discussed in addition to the benefits and limitations of plastics applications in agriculture generally. Features: Illustrates application of plastic in protected cultivation, water management, aquaculture, and hi-tech horticulture using innovative technologies to enhance water use efficiency and crop productivity. Presents precision farming for climate resilient technologies. Includes real world examples to present practical insights of plastic engineering for climate change mitigation strategies. Plasticulture Engineering and Technology will serve as a useful resource for students, professionals, and researchers in agriculture and agricultural engineering, hydrology, hydraulics, water resources engineering, irrigation engineering, and environmental science.

Climate Change and Agricultural Development Udaya Sekhar Nagothu, 2016-07-15 Two of the greatest current challenges are climate change and variability and food security. Feeding nine billion people by 2050 will require major efforts aimed at climate change adaptation and mitigation. One approach to agriculture has recently been captured by the widely adopted term of Climate Smart Agriculture (CSA). This book not only explains what this entails but also presents practical on-the-ground studies of practices and innovations in agriculture across

a broader spectrum including agroecology and conservation agriculture in less developed countries It is shown that CSA is not a completely new science and a number of its recommended technologies have been used for some time by local farmers all over the world What is relevant and new is the approach to exploit their adaptation and mitigation potential However a major limitation is the lack of evidence based knowledge that is necessary for policy makers to prepare strategies for adaptation and mitigation This book assembles knowledge of CSA agroecology and conservation agriculture and perspectives from different regions of the world to build resilient food systems The first part analyzes the concept opportunities and challenges and provides a global perspective drawing particularly on studies from Africa and Asia The second part of the book showcases results from various studies linked to soil water and crop management measures from an ongoing program in India as well as experiences from other regions The third section assesses the needs for an enabling policy environment mainstreaming gender and some final recommendations for up scaling and or out scaling innovations **The Indian**

**Journal of Agricultural Sciences** ,2017 *The Interplay Between Competition Law and Intellectual Property* Gabriella Muscolo, Marina Tavassi, 2019-01-17 Although competition law and intellectual property are often interwoven until this book there has been little guidance on how they work together in practice As the intersection between the two fields continues to grow worldwide both in case law and in regulation the book's markets based approach focusing on sectors such as pharmaceuticals IT telecoms energy and agriculture in eleven of the world's most active jurisdictions provides a much needed in depth understanding of how this interplay reveals itself among the different legal systems Written by a range of authors including judges regulators academics economists and practitioners in both fields the book provides an international comparative perspective as well as detailed analysis of specific cases policies and proposals for change Among the issues and topics covered are the following free movement of goods and the protection of intellectual property rights standard essential patents intellectual property rights between technological development and consumer protection geo blocking online platforms and antitrust excessive prices In this context special attention is paid throughout to the increasing dialogue among Competition Authorities and between Judges and Competition Authorities around the world As matchless remedy for the lack of uniformity heretofore the book's investigation of the nexus between competition law and intellectual property in different sectors and in various countries takes a giant step towards a more balanced approach and more levelled regulation and practices It will be warmly appreciated by policy makers decision makers regulators practitioners and academics in both competition law and intellectual property fields **California Agriculture** ,2021 [New Zealand Agricultural Science](#) ,1987 **Routledge Handbook of Gender and Agriculture** Carolyn E. Sachs, Leif Jensen, Paige Castellanos, Kathleen Sexsmith, 2020-10-28 The Routledge Handbook of Gender and Agriculture covers major theoretical issues as well as critical empirical shifts in gender and agriculture Gender relations in agriculture are shifting in most regions of the world with changes in the structure of agriculture the organization of production international restructuring of value chains climate

change the global pandemic and national and multinational policy changes This book provides a cutting edge assessment of the field of gender and agriculture with contributions from both leading scholars and up and coming academics as well as policymakers and practitioners The handbook is organized into four parts part 1 institutions markets and policies part 2 land labor and agrarian transformations part 3 knowledge methods and access to information and part 4 farming people and identities The last chapter is an epilogue from many of the contributors focusing on gender agriculture and shifting food systems during the coronavirus pandemic The chapters address both historical subjects as well as ground breaking work on gender and agriculture which will help to chart the future of the field The handbook has an international focus with contributions examining issues at both the global and local levels with contributors from across the world With contributions from leading academics policymakers and practitioners and with a global outlook the Routledge Handbook of Gender and Agriculture is an essential reference volume for scholars students and practitioners interested in gender and agriculture Chapter 13 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license
