## **Ashrae Guide For Buildings In Hot And Humid Climates:**

**The ASHRAE Guide for Buildings in Hot and Humid Climates** Lewis G. Harriman,2008-01-01 This first edition provides decision makers with a basic explanation of the most common and far reaching issues for buildings in hot and humid climates. In each of these first chapters we provide specific suggestions for what each professional can do to improve buildings with respect to these key issues

## **The Ashrae Guide for Buildings in Hot and Humid Climates** ,2014-05-14

Focuses on needs of owners architects and engineers who build and manage buildings in hot and humid climates includes info on building enclosures dehumidification sustainability mold avoidance energy reduction moisture management and techniques for reducing energy consumption in hot and humid climates based on real world field experience and ASHRAE research

Provided by publisher **ICACE 2019** Mokhtar Awang, Meor Razali Meor M Fared,2020-02-27 This book presents

selected articles from the 3rd International Conference on Architecture and Civil Engineering 2019 held in Kuala Lumpur Malaysia Written by leading researchers and industry professionals the papers highlight recent advances and addresses

current issues in the fields of civil engineering and architecture **Architecture, City, Environment** Koen Steemers, Simos

Yannas,2000 PLEA is a network of individuals sharing expertise in the arts sciences planning and design of the built environment It serves as an international interdisciplinary forum to promote discourse on environmental quality in

architecture and planning This 17th PLEA international conference addresses sustainable design with respect to architecture city and environment at the turn of the millennium The central aim of the conference is to explore the interrelationships and integration of architecture city and environment The Proceedings will be of interest to all those involved in bioclimatic design and the application of natural and innovative techniques to architecture and planning The conference is organised by the Martin Centre for Architectural and Urban Studies University of Cambridge and the Cambridge Programme for Industry

University of Cambridge **Passive Low Energy Cooling of Buildings** Baruch Givoni,1994-07-27 A practical sourcebook

for building designers providing comprehensive discussion of the impact of basic architectural choices on cooling efficiency including the layout and orientation of the structure window size and shading exterior color and even the use of plantings around the site All major varieties of passive cooling systems are presented with extensive analysis of performance in different types of buildings and in different climates ventilation radiant cooling evaporative cooling soil cooling and cooling of outdoor spaces

## **A Handbook on Low-Energy Buildings and District-Energy Systems** L.D. Danny Harvey,2012-08-21

Winner of Choice Magazine Outstanding Academic Titles for 2007 Buildings account for over one third of global energy use and associated greenhouse gas emissions worldwide Reducing energy use by buildings is therefore an essential part of any strategy to reduce greenhouse gas emissions and thereby lessen the likelihood of potentially catastrophic climate change Bringing together a wealth of hard to obtain information on energy use and energy efficiency in buildings at a level which can be easily digested and applied Danny Harvey offers a comprehensive objective and critical sourcebook on low energy

buildings Topics covered include thermal envelopes heating cooling heat pumps HVAC systems hot water lighting solar energy appliances and office equipment embodied energy buildings as systems and community integrated energy systems cogeneration district heating and district cooling The book includes exemplary buildings and techniques from North America Europe and Asia and combines a broad holistic perspective with technical detail in an accessible and insightful manner

**Rural Structures in the Tropics** Geoffrey C. Mrema,2011 This book will help to improve teaching at all educational levels on the subject of rural buildings in developing countries of the tropics and it will assist professionals currently engaged in providing technical advice on rural structures and services from either agricultural extension departments or non governmental rural development organizations This book will also provide technical guidance in the context of disaster recovery and rehabilitation for rebuilding the sound rural structures and related services that are key to development and economic sustainability

**Handbook of Retrofitting High Density Residential Buildings** Bertug Ozarisoy,Hasim Altan,2023-01-01 This book investigates energy use and measures to improve the energy efficiency of public housing using post war social housing development estates in Cyprus as its example On this Mediterranean island which experiences hot and humid temperatures throughout the year residential buildings need to adapt to the climate to improve the thermal comfort of their occupants The book assesses the domestic energy use of inefficiently built residential tower blocks and their occupants thermal comfort by considering the significant impact of overheating risks on energy consumption and occupants thermal comfort and well being with the intention of evaluating the current energy performance of base case representative residential tower blocks RTBs In particular considering the cooling energy demand in the summer using Famagusta Cyprus as a case study It seeks to identify the impact of occupancy patterns and habitual adaptive behaviour of households on home energy performance in order to provide bases for the information needed to calibrate building energy performance of targeted households

**Routledge Handbook of Resilient Thermal Comfort** Fergus Nicol,Hom Bahadur Rijal,Susan Roaf,2022-04-19 This book brings together some of the finest academics in the field to address important questions around the way in which people experience their physical environments including temperature light air quality acoustics and so forth It is of importance not only to the comfort people feel indoors but also the success of any building as an environment for its stated purpose The way in which comfort is produced and perceived has a profound effect on the energy use of a building and its resilience to the increasing dangers posed by extreme weather events and power outages caused by climate change Research on thermal comfort is particularly important not only for the health and well being of occupants but because energy used for temperature control is responsible for a large part of the total energy budget of the built environment In recent years there has been an increasing focus on the vulnerabilities of the thermal comfort system how and why are buildings failing to provide safe and agreeable thermal environments at an affordable price Achieving comfort in buildings is a complex subject that involves physics behaviour physiology energy conservation climate change and of course architecture and urban

design Bringing together the related disciplines in one volume lays strong multi disciplinary foundations for new research and design directions for resilient 21st century architecture This book heralds workable solutions and emerging directions for key fields in building the resilience of households organisations and populations in a heating world *Builder's Guide to Mixed/Humid Climates* Joseph W. Lstiburek,2005 The Builder's Guide provides the building industry with the latest and best practical information on how to apply building science principles to structures as systems in mixed humid climate regions Publisher's website *ASHRAE Handbook*,2005 *Damp Indoor Spaces and Health* Committee on Damp Indoor Spaces and Health,2004-08-31 Almost all homes apartments and commercial buildings will experience leaks flooding or other forms of excessive indoor dampness at some point Not only is excessive dampness a health problem by itself it also contributes to several other potentially problematic types of situations Molds and other microbial agents favor damp indoor environments and excess moisture may initiate the release of chemical emissions from damaged building materials and furnishings This new book from the Institute of Medicine examines the health impact of exposures resulting from damp indoor environments and offers recommendations for public health interventions Damp Indoor Spaces and Health covers a broad range of topics The book not only examines the relationship between damp or moldy indoor environments and adverse health outcomes but also discusses how and where buildings get wet how dampness influences microbial growth and chemical emissions ways to prevent and remediate dampness and elements of a public health response to the issues A comprehensive literature review finds sufficient evidence of an association between damp indoor environments and some upper respiratory tract symptoms coughing wheezing and asthma symptoms in sensitized persons This important book will be of interest to a wide ranging audience of science health engineering and building professionals government officials and members of the public
