Solomon's Knot Robert D. Cooter,Hans-Bernd Schäfer,2011-12-27 Why law is critical to innovation and economic growth Sustained growth depends on innovation whether it's cutting edge software from Silicon Valley an improved assembly line in Sichuan or a new export market for Swaziland's leather Developing a new idea requires money which poses a problem of trust The innovator must trust the investor with his idea and the investor must trust the innovator with her money Robert Cooter and Hans Bernd Schäfer call this the double trust dilemma of development Nowhere is this problem more acute than in poorer nations where the failure to solve it results in stagnant economies In Solomon's Knot Cooter and Schäfer propose a legal theory of economic growth that details how effective property contract and business laws help to unite capital and ideas They also demonstrate why ineffective private and business laws are the root cause of the poverty of nations in today's world Without the legal institutions that allow innovation and entrepreneurship to thrive other attempts to spur economic growth are destined to fail Senate documents ,1893 Reports of the United States Board of Tax Appeals ,1935 **SEC Docket** United States.
