

7th Grade Math

Ratios & Proportional Relationships

Analyze proportional relationships & use them to solve problems

Apply & extend previous understandings of operations with fractions to \mathbb{R} , \mathbb{Z} , & \mathbb{Q}

Use properties of operations to generate equivalent expressions

Solve problems using numerical & algebraic expressions & equations

Draw, construct & describe geometrical figures & describe the relationships between them

Solve problems involving angle measure, area, surface area, & volume

Use random sampling to draw inferences about a population

Draw informal comparative inferences about 2 populations

Investigate chance processes & develop, use, & evaluate probability models

The Number System

- * Compute unit rates associated with ratios of fractions, including ratios of lengths, areas & other quantities measured in like or different units

- * Recognize & represent proportional relationships between quantities

- * Use proportional relationships to solve multistep ratio & percent problems

- * Apply & extend previous understanding of addition & subtraction to rational numbers

- * Apply & extend understanding of multiplication & division of fractions to multiply & divide rational numbers

- * Solve problems involving the 4 operations with rational numbers

- * Apply properties of operations as strategies to add, subtract, factor, & expand linear expressions with rational coefficients

- * Understand that rewriting an expression in a different form, in a problem context, can shed light on the problem & how the quantities in it are related

- * Solve problems posed with positive & negative numbers in any form

- * Use variables to represent quantities in a problem & construct simple equations & inequalities to solve problems

- * Solve problems involving area & drawings of geometric figures

- * Use geometric shapes with given conditions

- * Describe the 3-dimensional figures that result from slicing 3-dimensional figures

- * Know the formulas for the area & circumference of a circle. Use them to solve problems

- * Use facts about linearity, congruence, vertical, & adjacent angles in a multi-step problem to solve

- * Solve problems involving area, volume, & surface area of 3- dimensional objects composed of triangles, quadrilaterals, polygons, cubes, & right prisms

- * Understand that statistics can be used to gain information about a population by examining a sample of the population

- * Use data from a random sample to draw inferences about a population by comparing the sample statistics to those of the population

- * Informally assess the degree of visual overlap of 2 numerical data distributions with similar variabilities

- * Use measures of center & variability for numerical data from random samples to draw informal comparative inferences about 2 populations

- * Understand that the probability of a chance event is a number between 0 and 1 that expresses the likelihood of the event occurring

- * Approximate the probability of a chance event by collecting data

- * Develop probability models & use them to find probabilities of events

- * Find probabilities of compound events using organized lists, tables, tree diagrams, & simulations
