Some subsistence fishers claim that government and commercial fishermen try to stop them from basket fishing. The report points to the lack of a national fisheries policy. Such a policy could help support and safeguard this major source of livelihood.

Amazoniana ,2006 **Bulletin of Marine Science of the Gulf and Caribbean** ,1996 *Canadian Journal of Fisheries and Aquatic Sciences* ,2006 **Copeia** ,1988 **The Cumulative Book Index** ,1988. A world list of books in the English language. *Global Perspectives on River Conservation* P. J. Boon, B. R. Davies, Geoffrey E. Petts, 2000-10-03. Throughout the world river conservation is becoming an increasingly important concern. In arid regions for instance rivers often form the only water resource for human sustenance; indeed the World Bank has predicted that future wars will be about water. In many parts of the developing world rivers are used as repositories for waste and river ecosystems consequently reflect the worst excesses of human exploitation. In the industrialised nations the focus of attention is beginning to move from chemical clean up to restoring the structural damage to rivers caused by decades of river engineering. Recognition is growing that river management needs a catchment wide perspective if the needs of human populations, river habitats and wildlife are to reach a sustainable balance. The development of river conservation strategies has become a global imperative. *Global Perspectives on River Conservation* is the first book that provides a truly global synthesis of knowledge on river conservation with the aim of encouraging strategic river planning. It does this in two ways. First it sets out a worldwide region by region overview of the science, policy and practice of river conservation. Second it provides a topical review of different river settings such as tropical, temperate, temporary, perennial, large, small and contemporary issues in river conservation such as classification and evaluation, environmental legislation, the role of public participation. *Global Perspectives on River Conservation* is an invaluable reference for river managers, planners and developers, conservationists, statutory water agencies, government departments, academics, researchers, postgraduates and final year undergraduates working in the field of environmental management of inland waters.
