1998 SI5manual Guide:

Steel Detailers' Manual Alan Hayward, Frank Weare, A. C. Oakhill, 2008-04-15 This highly illustrated manual provides practical guidance on structural steelwork detailing. It describes the common structural shapes in use and how they are joined to form members and complete structures, explains detailing practice and conventions, provides detailing data for standard sections, bolts and welds, emphasises the importance of tolerances in order to achieve proper site fit up, discusses the important link between good detailing and construction costs. Examples of structures include single and multi storey buildings, towers and bridges. The detailing shown will be suitable in principle for fabrication and erection in many countries and the sizes shown will act as a guide to preliminary design. The second edition has been updated to take account of changes to standards including the revisions to BS5950 and includes a new chapter on computer aided detailing. **Steel**

Designers' Manual SCI (Steel Construction Institute), 2016-06-27 In 2010 the then current European national standards for building and construction were replaced by the EN Eurocodes, a set of pan European model building codes developed by the European Committee for Standardization. The Eurocodes are a series of 10 European Standards EN 1990 EN 1999 that provide a common approach for the design of buildings, other civil engineering works and construction products. The design standards embodied in these Eurocodes will be used for all European public works and are set to become the de facto standard for the private sector in Europe with probable adoption in many other countries. This classic manual on structural steelwork design was first published in 1955 since when it has sold many tens of thousands of copies worldwide. For the seventh edition of the Steel Designers Manual, all chapters have been comprehensively reviewed, revised to ensure they reflect current approaches and best practice and brought in to compliance with EN 1993 Design of Steel Structures, the so called Eurocode 3.
