

A vibrant, pixelated illustration of a tropical beach at sunset. In the foreground, a large, stylized sun is setting over the ocean, casting a warm glow. Two palm trees stand prominently on the left; the one on the far left is smaller, while the one next to it is larger with a thick, textured trunk and several green fronds. The background is a soft, hazy sky with a gradient from orange to blue, suggesting a clear evening. The overall aesthetic is reminiscent of a video game or a digital artwork.

Who's the New Kid in Chemistry? John D. Butler, 2013-12-12 Who's the New Kid in Chemistry offers an unprecedented look at student engagement and teacher best practices through the eyes of an educational researcher enrolled as a public high school student. Over the course of seventy nine consecutive days John D. Butler participates in and observes Rhode Island 2013 Teacher of the Year Jessica M. Waters's high school chemistry class documenting his experiences as they unfold. Who's the New Kid in Chemistry is a compelling example of what can be accomplished when an educational researcher and teacher collaborate in the classroom. This work includes a discussion on flexible homework assignments, data driven instruction and thirty teacher best practices. This book is an invaluable resource for teachers across all content areas, masters and doctoral research method classes and future Teachers of the Year.

Inclusion Faith Edmonds Andreasen, 2014-04-02 Supporting Inclusion School Administrators Perspectives and Practices provides significant insights that arm the reader with a variety of ideas and easy to implement applicable strategies gleaned from knowledgeable contemporaries. This book details various approaches taken by administrators as they transitioned their schools from a segregated resource environment to an inclusive framework. From elementary to high school administrators in both large and small school districts describe approaches that best suited their populations needs. While transitioning to inclusion administrators created structures that maximized staff talent and encouraged faculty buy in. Challenges included calendaring collaboration time, providing inclusion and co teaching training, properly mentoring first year teachers, securing expert ancillary staff, retraining paraprofessionals from resource to inclusive supporting roles, procuring appropriate technology and supplemental resources, and presenting strategies to accommodate behaviorally challenged students. Programming often required shifting populations and leveling classes. Ultimately administrators established and sustained inclusive classrooms with a good deal of success.

Raising the Curve Ron Berler, 2013-03-05 Brookside Elementary in Norwalk, Connecticut is preparing for a new school year and another chance to improve its failing scores on the statewide standardized test known as the CMT. The challenges are many and for the faculty whose jobs may depend on their students' ability to improve on the test the stakes are high. Ten year old Hydeia is about to start fifth grade with second grade reading skills. Her friend Marbella is only a little further along. In past years these students would have received help from the literacy specialist Mrs. Schaefer. But this year due to cutbacks and a change in job description she will have to select the few students whom she and the teachers can bet on the ones who are close to passing the exams. And for added measure Principal Hay has already asked his faculty to teach to the test. Journalist Ron Berler spent a full year at Brookside. In Raising the Curve he offers a nuanced and personal portrait of the students, teachers and staff who make up the Brookside community capturing their struggles as well as their pride, resilience and spirited faith.
