

MENSTRUAL CYCLE LAB

Background Information

Puberty and the Menstrual Cycle

When a human female is born, her ovaries already contain all the immature eggs that will later mature and produce functional eggs during her lifetime. Eggs usually begin to mature between the ages of 12 and 14, when a release of hormones triggers **puberty**, and a young woman reaches sexual maturity. Most commonly, eggs mature every 28 days or so. They usually mature **ONE** at a time, in alternating ovaries. These rhythmic maturation of eggs and of chemical and physical events are called the **menstrual cycle**.

Endocrine Gland	Hormone	Function
	FSH	<ul style="list-style-type: none">Stimulates follicular growth in ovariesStimulates estrogen secretion (from developing follicles)
	LH	<ul style="list-style-type: none">Surge causes ovulationResults in the formation of a corpus luteum
	Estrogen	<ul style="list-style-type: none">Thickens uterine lining (endometrium)Inhibits FSH and LH for most of cycleStimulates FSH and LH release pre-ovulation
	Progesterone	<ul style="list-style-type: none">Thickens uterine lining (endometrium)Inhibits FSH and LH

The Pituitary Gland

The pituitary gland is located at the base of the brain and secretes the hormones **FSH** and **LH**. Increasing levels of a hormone, **FSH (follicle stimulating hormone)**, eggs start to mature in a woman's ovary. Each egg matures inside an egg sac, or follicle. When the egg is fully mature, another hormone, **LH (luteinizing hormone)** reaches peak level, causing the follicle to burst and the release of the egg. The process is called **ovulation**. Tiny microscopic hairs called **cilia** at the opening to the Fallopian tube will sweep the egg into the tube which leads to the uterus.

- **FSH** stimulates the egg to mature
- **LH** causes the egg to rupture from the ovary in a process called **ovulation**!

The Ovary

The ovary produces the hormones **estrogen** and **progesterone**. As a result of the increasing levels of the hormone **estrogen**, the lining of the uterus has been prepared to receive a fertilized egg by building up its lining with nurturing tissues and blood vessels. After ovulation, the ovary releases the hormone **progesterone**. High levels of **progesterone** to help maintain the uterine lining.

- **Estrogen** builds up the uterine lining
- **Progesterone** maintains the uterine lining

Answers To The Human Menstrual Cycle Lab

Answers To The Human Menstrual Cycle Lab:

The Geometry of Biological Time Arthur T. Winfree, 2013-06-29 As I review these pages the last of them written in Summer 1978 some retrospective thoughts come to mind which put the whole business into better perspective for me and might aid the prospective reader in choosing how to approach this volume. The most conspicuous thought in my mind at present is the diversity of wholly independent explorations that came upon phase singularities in one guise or another during the past decade. My efforts to gather the published literature during the last phases of actually writing a whole book about them were almost equally divided between libraries of Biology Chemistry Engineering Mathematics Medicine and Physics. A lot of what I call gathering was done somewhat in anticipation in the form of conjecture query and prediction based on analogy between developments in different fields. The consequence throughout 1979 was that our long suffering publisher repeatedly had to replace such material by citation of unexpected flurries of papers giving substantive demonstration. I trust that the authors of these many excellent reports and especially of those I only found too late will forgive the brevity of allusion. I felt compelled to observe in these substitutions A residue of loose ends is largely collected in the index under QUERIES. It is clear to me already that the materials I began to gather several years ago represented only the first flickering of what turns out to be a substantial conflagration.

Toxic Shock Sharra L. Vostral, 2018-11-27 A history of Toxic Shock Syndrome. In 1978 doctors in Denver Colorado observed several healthy children who suddenly and mysteriously developed a serious life threatening illness with no visible source. Their condition which doctors dubbed toxic shock syndrome TSS was rare but observed with increasing frequency over the next few years in young women and was soon learned to be associated with a bacterium and the use of high absorbency tampons that had only recently gone on the market. In 1980 the Centers for Disease Control identified Rely tampons produced by Procter the insufficient testing of the first super absorbency tampon how TSS became a women's disease for which women must constantly monitor their own bodies. Further Vostral discusses the awkward veiled and vague ways public health officials and the media discussed the risks of contracting TSS through tampon use because of social taboos around discussing menstruation and how this has hampered regulatory actions and health communication around TSS tampon use and product safety. A study at the intersection of public health and social history Toxic Shock brings to light the complexities behind a stigmatized and under discussed issue in women's reproductive health. Importantly Vostral warns that as we move forward with more and more joint replacements implants and internal medical devices we must understand the relationship of technology to bacteria and recognize that both can be active agents within the human body. In other words unexpected consequences and risks of bacteria and technology interacting with each other remain.

Lets delve into the realm of popular books, exploring the engaging narratives that have charmed audiences this year. Answers To The Human Menstrual Cycle Lab : Colleen Hoovers "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Answers To The Human Menstrual Cycle Lab : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and thrilling novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
