

## A/ The Interface of Artlantis Studio

### Customizable Toolbar

With a right-click you can add or remove buttons from the toolbar

### Real-Time Preview Window

One of the strengths of Artlantis is its real-time preview window. Every change you make to camera positions, shaders, textures, objects, sun, lights, etc. will immediately appear in the preview window. It displays scenes in permanent radiosity that are consistent with the final rendering.

### Camera Inspector

This is the main organizer of your presentations. Each camera position can have different sun, light, background or other customized parameters. This way you can work and store day scenes and night scenes in the same file.

### Catalog

Here you can find all the Artlantis library features known as Media: shaders, objects, pictures/textures, and postcards. Organized in three main partitions, the Catalog offers a very user-friendly interface that reflects the structure of your hard drive. New folders can be added by clicking the + sign in the bottom right-hand corner of the Catalog.

**NOTE:** The size of the real-time preview window can be enlarged or reduced. You can even organize your work on two screens as there is no limitation in size. In the main menu go to Display > Enlarge; or Display > Reduce
