primary judicial decisions and international legal instruments that animate internationally a concept that began in U S domestic law The descriptive section concludes with a list of twenty two judge made and text made rights and privileges presently available to the ICP that are not available to other international legal personalities these are later categorized into active and passive rights The normative section of the book begins the shift from what is to what ought to be by sketching a theory of the ICP that unlike existing attempts to place the corporation in international legal theory does not rely on analogical reasoning Rather it adopts the Jessupian emphasis on human problems and encourages pragmatic solution oriented legal analysis and interpretation especially in arbitral tribunals and international courts where legal reasoning is frequently borrowed from domestic law and international treaty regimes It suggests that ICPs should have passive or procedural rights that cater to problems that can be characterized as universal but that international law should avoid universalizing active or substantive rights which ICPs can shape through agency The book concludes by identifying new trajectories in law relevant to the future and evolution of the ICP This book will be most useful to students and practitioners of international law but provides riveting material for anyone interested in understanding the phenomenon of international corporate personhood or the international law surrounding corporations more generally
