Poetry, consciousness and community Christopher (Kit) Kelen, 2009-01-01 The process of poetry has importantly intuitive aspects and poetry embodies an ambivalence towards consciousness and towards those activities of thought in which it is constituted It was ability to favour doubt over the productions of the rational mind that led Keats to associate poetry with his negative capability Consciousness is like poetry a floating signifier a term of wide reference and with a range of implications in the various disciplinary contexts in which it finds currency Poetry consciousness and community is about poetry consciousness and community about their reflexive relationships in process and about how these relationships matter to the world today and to worlds to come This book is interested in the nature of poetic as opposed to other thought it is interested in the critical application of these forms of thought to each others productions and in how poetic thought might or might not be subject to its own regime Poetry as practice of testing the limits of language entails a reflexive goal that of understanding the journey in words made possible for and by the poem Poetic meaning and truth are revealed between languages likewise between genres between texts between subjects it is in this inter subjective and inter cultural space that the limits of language and so of conceivable worlds are found *Catalogue, Classified and Alphabetical* Saint Louis (Mo.).
