### Altered

Sensations David Pantalony, 2009-09-18 Rudolph Koenig was one of the more prolific and colourful instrument makers in the

renowned nineteenth century precision instrument trade of Paris. Beginning his career as a violin maker in 1858 the young Prussian immigrant shifted his talents towards the growing field of acoustics. Altered Sensations is a portrait of his vibrant atelier a place of construction, commerce and experiment. For over forty years it was also a popular meeting place for scientists, artisans, musicians and teachers. Using archival and collection research from across North America and Europe David Pantalony has traced the material and social influences of this space on the development of modern acoustics. In

particular he has detailed the manner in which Koenig modified, extended, spread and challenged Hermann von Helmholtz's Sensations of Tone. A large part of the research on Koenig comes from the actual products of his workshop which survive in museums and collections around the world. The second section of Altered Sensations provides a Catalogue Raisonné of Koenig's entire line of instruments including their history, details from specific examples, locations and references in the literature. This catalogue will serve as a practical guide for curators and researchers as well as a comprehensive overview of nineteenth century acoustical practice.

## Encyclopedia of Geomagnetism and Paleomagnetism

David Gubbins, Emilio Herrero-Bervera, 2007-07-19 Understanding the process underlying the origin of Earth's magnetic field is one of the greatest challenges left to classical Physics. Geomagnetism being the oldest Earth science studies the Earth's magnetic field in its broadest sense. The magnetic record left in rocks is studied in Paleomagnetism. Both fields have applications pure and applied in navigation in the search for minerals and hydrocarbons in dating rock sequences and in unraveling past geologic movements such as plate motions. They have contributed to a better understanding of the Earth. Consisting of more than 300 articles written by ca 200 leading experts this authoritative reference encompasses the entire fields of Geomagnetism and Paleomagnetism in a single volume. It describes in fine detail at an assessable level the state of the current knowledge and provides an up to date synthesis of the most basic concepts. As such it will be an indispensable working tool not only for geophysicists and geophysics students but also for geologists, physicists, atmospheric and environmental scientists and engineers.
