remain a significant global force for the rest of the twentieth century and in submarine warfare especially in the second half of the Cold War to achieve influence and impact for Britain far exceeding resources expended This compelling new history will have wide appeal to all readers interested in intelligence and its crucial impact on naval policy and operations

Politics of Muslim Identities in Asia Iulia Lumina,2021-10-15 Approaching religious identity with an emphasis on agency and contestation this book offers a historical perspective on the development of Muslim identities in Asia It examines the contingent politics that influence how Muslims constitute themselves as modern subjects Through 9 country based case studies the book analyses how Muslims articulate their religious identity vis a vis the state and society in which they live and how their position relates to specific social and political contexts The contributors survey how religious affiliation sparks a politics of difference in contexts where Islamic practices beliefs and aspirations are contested as well as where Muslims are framed as the Other

Awakening to China's Rise Hugo Meijer,2022-08-01 Awakening to China's Rise provides the most comprehensive analysis to date of how Europe's major powers have responded to the re emergence of China as a great power in world politics since the end of the Cold War To do so it puts forward a unique cross regional comparison of how the major European powers France Germany and the United Kingdom have confronted Chinese assertiveness both in the Asia Pacific and in Europe Firstly it analyses their response to China's increasingly muscular regional posture in the Asia Pacific through the development of diplomatic and security initiatives with partners in the region Secondly it delineates how they have confronted China's inroads into Europe looking at the measures that they have taken to tackle Chinese investments in and supply of technologies in strategic sectors such as critical national infrastructures dual use technologies and in the digital domain including Huawei's 5G networks A longstanding assumption in the IR literature has been that European foreign policies toward the People's Republic of China have been driven by a naive and self interested focus on the economic opportunities presented by such a vast market overlooking security considerations This book challenges such common belief through a detailed examination of the policies of France Germany and the United Kingdom from 1989 to the present Its central argument is that whereas this assessment aptly characterized the first two post Cold War decades Beijing's growing assertiveness after 2009 caused the three major European powers to awaken to China's rise In the 2010s heightened threat perceptions of China coupled with increasingly competitive bilateral economic relations with the PRC have gradually and cumulatively caused the hardening of their policy goals which in turn translated into the formulation of new policy instruments to confront such a challenge To substantiate this argument the book relies on a large body of previously undisclosed primary sources including 223 interviews conducted with senior officials in Europe Berlin Brussels London Paris in the United States Washington DC and in Asia Beijing Shanghai New Delhi Seoul declassified archival documents from France the UK and Germany leaked US diplomatic cables and new data on European naval deployments

Freedom of Overflight Merinda E. Stewart,2021-10-25 Freedom of overflight is in large part uncontroversial However several recent

international disputes and subsequent scrutiny of the exercise of coastal State jurisdiction in international airspace have highlighted the problematic legal nature of this freedom namely how a State's creeping jurisdiction may encroach upon the rights of other States This groundbreaking book examines in depth the ambiguous areas at the nexus of air law and the law of the sea with respect to the balance between coastal State jurisdiction and freedom of overflight thus providing greater legal certainty regarding State actions involving overflight in international airspace The author identifies and thoroughly examines three highly salient matters impacting overflight in international waters the right of a State to establish safety zones around maritime constructions and the legitimacy of extending these safety zones to the airspace what if anything under international civil aviation law specifically prohibits a State from discriminating against the aircraft of another State in international airspace within its flight information region and whether air defence identification zones can be justified as customary international law Also considered is the law of the sea concerning transit passage through international straits and archipelagic sea lanes as applied to airspace users This is the first detailed study of overflight to combine the perspectives of international civil aviation law and the law of the sea As such it presents a comprehensive analysis of the legality of attempts by coastal States to exercise jurisdiction in international airspace over aircraft registered in other States thus taking a giant step towards determining what freedom of overflight entails by establishing its legitimate limitations It will be welcomed by practitioners policymakers and academics concerned with international transportation national defence international trade and other areas of international law
