English Language Learners in the Southeastern United States Ester J. de Jong,Eric Dwyer,Mary Elizabeth Wilson-Patton,2024-07-25 This book examines the impact of and response to the rapidly growing English language learner ELL populations in the southeastern United States on K 16 schooling Using examples of policy and practice from seven states Alabama Arkansas Florida Georgia North Carolina and Tennessee the book explores how the contemporary context of

accountability regimes and neoliberal tenets affect educational responses to the increased linguistic and cultural diversity in schools and how these realities may be different from when traditional states such as California or Florida were developing their responses to immigration. The collection of chapters addresses key questions of teacher preparation, effective infrastructures and frameworks for serving ELLs, dual language bilingual education and advocacy efforts at the state, district and local level in the Southeast. The authors describe promising practices in each state but also note the need for more systemic statewide approaches that resist the enduring monolingual discourse that has historically characterized much of ELL schooling. They call for transformative policies and practices that take current research into account and that stress the centrality of pluralistic principles to design effective schools for ELLs.

Lockwood argues that contemporary character education can be significantly improved by using key principles from established theories and research on developmental psychology. He offers numerous examples to support his recommendations while inviting character education theorists and practitioners to generate their own implications from his presentation.
