What are the factors which would make an individual more inclined to choose your brand? This book offers a way to predict which brand a buyer will purchase. It looks at brand performance within a product category and tests it in different countries with very different cultures. Following the Predictive Brand Choice (PBC) model, this book seeks to predict a consumer's loyalty and choice. Results have shown that PBC can achieve a high level of predictive accuracy in excess of 70% in mature markets. This accuracy holds even in the face of price competition from a less preferred brand. PBC uses a prospective predicting method which does not have to rely on a brand's past performance or a customer's purchase history for prediction. Choice data is gathered in the retail setting at the point of sale. **The Strategy of Global Branding and Brand Equity** presents survey data and quantitative analyses that prove the method described to be practical, useful and implementable for both researchers and practitioners of commercial brand strategies **Engineering Management** C. This second edition refocuses on the new strategy for science, technology, engineering and math (STEM) professionals and managers to meet the global challenges through the creation of strategic differentiation and operational excellence. Major revisions include a new chapter on creativity and innovation, a new chapter on operational excellence and combination of the chapters on financial accounting and financial management.
