# 2013 Sublevels Grammar

**Kassem M. Wahba, Zeinab A.  
Taha, Manuela E. B. Giolfo**

## **2013 Sublevels Grammar:**

*Interfaces in Functional Discourse Grammar* Lucía Contreras-García, Daniel García Velasco, 2021-08-23 In grammar design a basic distinction is made between derivational and modular architectures. This raises the question of which organization of grammar can deal with linguistic phenomena more appropriately. The studies contained in the present volume explore the interface relations between different levels of linguistic representation in Functional Discourse Grammar as presented in Hengeveld and Mackenzie 2008 and Keizer 2015. This theory analyses linguistic expressions at four linguistic levels: interpersonal, representational, morphosyntactic and phonological. The articles address issues such as the possible correspondences and mismatches between those levels as well as the conditions which constrain the combinations of levels in well-formed expressions. Additionally, the theory is tested by examining various grammatical phenomena with a focus both on the English language and on typological adequacy: anaphora, raising, phonological reduction, noun incorporation, reflexives and reciprocals, serial verbs, the passive voice, time measurement constructions, coordination, nominal modification and connectives. Overall, the volume provides both theoretical and descriptive insights which are of relevance to linguistics in general.

Chapter authors offer a range of perspectives on teaching approaches, implementing research findings in the classroom and future challenges. A much-needed volume to help students, teachers and teacher educators develop their knowledge and skills, it addresses the most salient and controversial issues in the field, including what grammar to teach, how much grammar to teach, how to address grammar in content-based or communication-based classroom and how to teach variation in grammar. **Multiple Perspectives on Learner Interaction**

William J. Crawford, 2021-09-07 In the field of Second Language Studies, shared datasets provide a valuable contribution to second language research as many variables are held constant e.g. participants, tasks, research context, thus allowing for an evaluation of theoretical and/or methodological perspectives that may not otherwise be comparable. This edited volume includes a wide range of studies using a common dataset, the Corpus of Collaborative Oral Tasks. The corpus includes 820 spoken tasks, 268,927 words carried out by dyads of L2 English speakers, primarily Chinese and Arabic learners. Studies included in the book are categorized into three main traditions: learner corpus research, Task-Based Language Teaching and assessment. Because the corpus contains text and sound files, both lexicogrammatical and phonological analyses are included. Intended for researchers in the field of Second Language Studies with an interest in oral interaction research, this book
