Early Engineering Learning Lyn English, Tamara

Moore, 2018-05-29 This book addresses engineering learning in early childhood spanning ages 3 to 8 years It explores why engineering experiences are important in young children's overall development and how engineering is a core component of early STEM learning including how engineering education links and supports children's existing experiences in science mathematics and design and technology both before school and in the early school years Promoting STEM education across the school years is a key goal of many nations with the realization that building STEM skills required by societies takes time and needs to begin as early as possible Despite calls from national and international organisations the inclusion of

engineering based learning within elementary and primary school programs remains limited in many countries Engineering experiences for young children in the pre school or early school years has received almost no attention even though young children can be considered natural engineers This book addresses this void by exposing what we know about engineering for young learners including their capabilities for solving engineering based problems and the few existing programs that are capitalising on their potential

involved the use of tables and percentages to interpret findings The study uncovered that while certain divisions such as the E Learning Services are automated the broader library system at Limkokwing University is not fully automated Key ICT resources utilized include CD ROMs online databases and the World Wide Web primarily for information storage and retrieval purposes The research underscores the substantial impact of ICTs on library effectiveness In conclusion this study advocates for increased adoption of ICTs at Limkokwing University Library emphasizing the need for enhanced financial support to develop basic ICT infrastructure Furthermore it highlights the challenges posed by insufficient staffing and unreliable power supply recommending the integration of standby generators to mitigate frequent power outages This book aims to serve as a valuable resource for librarians educators administrators and policymakers seeking to leverage ICTs in their respective institutions By sharing insights and lessons learned from Limkokwing University s experience we aspire to inspire and guide others toward establishing more efficient responsive and technologically advanced academic libraries

Higher Education and Policy for Creative Economies in Africa Roberta Comunian,Brian J. Hracz,Lauren England,2020-11-04 The book reflects on the role of the creative economies in a range of African countries namely Ghana Kenya Nigeria South Africa and Uganda Chapters explore how creative economies emerge and can be supported in African countries The contributors focus on two key dimensions the role of higher education and the role of policy Firstly they consider the role of higher education and alternative forms of specialised education to reflect on how the creative aspirations of students and future creative workers of these countries are met and developed Secondly they explore the role of policy in supporting the agendas of the creative economy taking also into consideration the potential historical dimension of policy interventions and the impact of a lack of policy frameworks The book concludes by reflecting on how these two pillars of creative economy development which are usually taken for granted in studying creative economies in the global north need to be understood with their own specificity in the context of our selected case studies in Africa This book will be of interest to students scholars and professionals researching the creative economies in Africa across the humanities and social sciences All the royalties from the publication of this book will be donated to the not for profit organisation The Craft and Design Institute CDI <https://www.thecdi.org.za> in South Africa supporting capacity building for young creative practitioners from disadvantaged backgrounds

Guiding Young Children Patricia F. Hearron,Verna Hildebrand,2005 The seventh edition of this popular book supports the authors belief that guidance is more than getting children to do what you want them to do now it is helping them to become everything they can become for all of their tomorrows The book provides an overview followed by discussion of core concepts strategies for applying those concepts and finally the broader perspective of professionalism and human resource development Its approach focuses on the need to consider a child s developmental level as well as family and cultural context when planning environments and activities for young children Unlike others in the field it offers concrete suggestions on how to guide children while they are involved in specific activities such as playing eating
