

MARK SCHEME for the May/June 2013 series

9707 BUSINESS STUDIES

9707/33

Paper 3 (Case Study), maximum raw mark 100

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

Jakhu,2016-07-15 The Routledge Handbook of Public Aviation Law is the first book to incorporate a comprehensive analysis of Public Aviation Law principally international but also domestic law in a comparative context in a single volume

International Law is pervasive in Aviation Law and is incorporated into a number of major multilateral treaties e g the Chicago Convention of 1944 for Public International Air Law This is supplemented by various Annexes promulgated by the International Civil Aviation Organization and Conventions and Protocols promulgated by States in diplomatic conferences

Particles of Truth C. Arden Pope III, Douglas W. Dockery, 2025-04-01. A compelling real life account of how scientists uncovered air pollution's deadly impact on human health and the contentious battles to use key scientific evidence in the critical fight for clean air. *Particles of Truth* is a riveting account of the discovery of the critical health effects of air pollution told by Arden Pope and Douglas Dockery who have been at the forefront of air pollution and health research for four decades. With an insightful foreword by former EPA Administrator Gina McCarthy, this compelling book provides an inside look at groundbreaking scientific research and ensuing political and public policy battles. It presents evidence that air pollution is a major contributor to disease and death and that reducing air pollution saves lives. The book also delves into intense efforts to discredit and cast doubt on the science. Through firsthand accounts, Pope and Dockery bring the scientific discoveries regarding the health effects of air pollution and accompanying controversies to life. They describe the real world challenges of conducting impactful research when public health clashes with economic interests and politics. Despite these challenges, they and their colleagues persisted, accumulating evidence that supports landmark clean air legislation and pollution reduction efforts worldwide. More than an inside look at pioneering air pollution research and the hidden health burden of air pollution, *Particles of Truth* is a story of determination and perseverance by those working to protect air quality and our health. Indeed, their efforts have contributed to improvements in public health and an increase in longevity. For anyone interested in public health, environmental quality, or public policy, this is a must-read book that takes you to the front lines of discovery and controversy.
