An Accidental Blog April 2011:

The Fukushima Dai-Ichi Accident Peter Bernard Ladkin, Christoph Goeker, Bernd Sieker, 2013 In March 2011 following a strong earthquake a tsunami rolled over the protective seawall of the Fukushima Dai Ichi nuclear power plant in Japan and flooded it. The cooling systems were taken out following a scenario described by a sociologist four years previously. How is it that a sociologist predicted an accident mechanism that engineers had somehow missed? System safety engineers and sociologists gathered together in Bielefeld Germany in August 2011 to discuss this and other phenomena. This book is the result of that gathering. The authors of the chapters in this book are truly outstanding scholars whose expertise, intellectual prowess and wisdom about disasters such as that which occurred at Fukushima cannot be questioned. *Journal of Sociology Social Welfare* September 2014 Series: Engineering Ingenieurwissenschaften Vol 1 Subject: Engineering Sociology **3.11**

Richard J. Samuels, 2013-03-19 On March 11 2011 Japan was struck by the shockwaves of a 9.0 magnitude undersea earthquake originating less than 50 miles off its eastern coastline. The most powerful earthquake to have hit Japan in recorded history, it produced a devastating tsunami with waves reaching heights of over 130 feet that in turn caused an unprecedented multireactor meltdown at Fukushima Daiichi Nuclear Power Plant. This triple catastrophe claimed almost 20 000 lives, destroyed whole towns and will ultimately cost hundreds of billions of dollars for reconstruction. In 3.11 Richard Samuels offers the first broad scholarly assessment of the disaster's impact on Japan's government and society. The events of March 2011 occurred after two decades of social and economic malaise as well as considerable political and administrative dysfunction at both the national and local levels and resulted in national soul searching. Political reformers saw in the tragedy cause for hope, an opportunity for Japan to remake itself. Samuels explores Japan's post-earthquake actions in three key sectors: national security, energy policy and local governance. For some reformers 3.11 was a warning for Japan to overhaul its priorities and political processes. For others, it was a once-in-a-millennium event; they cautioned that while national policy could be improved, dramatic changes would be counterproductive. Still others declared that the catastrophe demonstrated the need to return to an idealized past and rebuild what has been lost to modernity and globalization. Samuels chronicles the battles among these perspectives and analyzes various attempts to mobilize popular support by political entrepreneurs who repeatedly invoked three powerfully affective themes: leadership, community and vulnerability. Assessing reformers' successes and failures as they used the catastrophe to push their particular agendas and by examining the earthquake and its aftermath alongside prior disasters in Japan, China and the United States, Samuels outlines Japan's rhetoric of crisis and shows how it has come to define post-3.11 politics and public policy. *Fukushima Disaster* Danielle Smith-Llera, 2018 A massive tsunami caused by the strongest earthquake to ever hit Japan triggered the world's worst nuclear crisis since the Chernobyl accident 25 years earlier. The monster waves that crashed into the Fukushima Daiichi nuclear plant in March 2011 killed 15 000 people and caused nuclear reactor meltdowns that threatened the lives of thousands more. The waves receded

long ago but the devastating effects of the nuclear accident still linger *The Normal Accident Theory of Education* Andrew K. Milton,2014-04-01 Much of the current debate about education too often resembles the blind men describing an elephant apprehending only a particular part of the situation or the process many analysts tell an evocative but incomplete story The so called reform discussion proceeds with a lack of depth about the nuances and realistic limitations in the institutional order of school This book argues that as regulation of schools moves further up the bureaucratic hierarchy first to state departments of education then to the national department of education the legal and institutional requirements get more intensive but less concretely useful in class rooms This bureaucratization serves to tighten the organizational environment thereby increasing the risk of normal accidents The increasing governmental management in other words makes it more likely that schools will fail to meet their goals Analyses of education are too often developed for public consumption in a fast moving political world This book examines some of the deeper organizational reasons why things don t work so well in school as well as a look at some of things that do work Most importantly the book will explain how the social and cultural expectations of what schools can do may create unrealistic hopes We as a society and schools as institutions embrace these unreasonably high hopes at our collective peril Check out Andrew s latest interview with Seattle Radio <http://kioradio.com/listen/9972862>

Modernisation of Chinese Culture Jana S. Rošker,Nataša Vampelj Suhadolnik,2013 The editors are grateful to the Chiang Ching kuo Foundation for its generous support of their research work which enabled them to publish the present book The present book carefully maps the Chinese modernisation discourse highlighting its relationship to other similar discourses and situating it within historical and theoretical contexts In contrast to the majority of recent discussions of a oeChinese development model that tend to focus more on institutional then cultural factors and are more narrowly concerned with economic matters than overall social development the book offers several important focal points for many presently overlooked issues and dilemmas The multifaceted perspectives contained in this anthology are not limited to economic social and ecological issues but also include political and social functions of ideologies and cultural conditioned values representing the axial epistemological grounds of modern Chinese society 2011 was the 100th anniversary of the Xinhai Revolution The centennial is relevant not only in terms of state ideology but also plays a significant role within academic research into

Chinese society and culture This historic turning point likewise represents the symbolic and concrete linkages and tensions between tradition and modernity progress and conservatism traditional values and the demands for adjustment to contemporary societies The book shows that Chinese transition from tradition to modernity cannot be understood in a framework of a unified general model of society but rather through a more complex insight into the interrelations among elements of physical environment social structure philosophy history and culture
