Literary Theory: A Complete Introduction Sara Upstone,2017-05-04 Literary theory has now become integral to how we produce literary criticism When critics write about a text they no longer think just about the biographical or historical contexts of the work but also about the different approaches that literary theory offers By making use of these they create new interpretations of the text that would not otherwise be possible In your own reading and writing literary theory fosters new avenues into the text It allows you to make informed comments about the language and form of literature but also about the core themes concepts such as gender sexuality the self race and class which a text might explore Literary theory gives you an almost limitless number of texts to work into your own response ensuring that your interpretation is truly original This is why although literary theory can initially appear alienating and difficult it is something to get really excited about Imagine you are standing in the centre of a circular room with a whole set of doors laid out around you Each doorway opens on to a new and illuminating field of knowledge that can change how you think about what you have read perhaps in just a small way but also perhaps dramatically and irrevocably You can open one door or many of them The choice is yours Put the knowledge you gain together with your own interpretation however and you have a unique and potentially fascinating response Each chapter in Literary Theory A Complete Introduction covers a key school of thought progressing to a point at which you'll have a full understanding of the range of responses and approaches available for textual interpretation As well as focusing on such core areas as Marxism Modernism Postmodernism Structuralism and Poststructuralism this introduction brings in recent developments such as Eco and Ethical Criticism and Humanisms

The Life of Texts Kiene Brillenburg Wurth,Ann Rigney,2019 This innovative introduction to literary studies takes the life of texts as its overarching frame It provides a conceptual and methodological toolbox for analysing novels poems and all sorts of other texts as they circulate in oral print and digital form It shows how texts inspire each other and how stories migrate across media It explains why literature has been interpreted in different ways across time Finally it asks why some texts fascinate people so much that they are reproduced and passed on to others in the form of new editions in adaptations to film and theatre and last but not least in the ways we look at the world and act out our lives The Life of Texts is designed around particular issues rather than

the history of the discipline as such Each chapter concentrates on a different aspect of the life of texts and introduces the key debates and concepts relevant to its study The issues discussed range from aesthetics and narrative to intertextuality and intermediality from reading practices to hermeneutics and semiotics popular culture to literary canonisation postcolonial criticism to cultural memory Key concepts and schools in the field have been highlighted in the text and then collected in a glossary for ease of reference All chapters are richly illustrated with examples from different language areas An English and updated version of the popular introduction to literary studies *Comparative Literary Studies* Siegbert Salomon
