An Introduction to Mathematical Physics Robert Alexander Houstoun,1920 *Aspects of the Gravitational and Thermal Physics of Solitons in Field Theory* Christopher Mark O'Neill,1996 **Thermocapillary Convection in Microgravity** Hiroshi Kawamura,Koichi Nishino,Satoshi Matsumoto,Ichiro Ueno,Taishi Yano,2025-09-23 This open access book overviews cutting edge research on thermocapillary convection driven by temperature dependence of surface tension A notable feature of the book is that it is concerned with a series of experiments performed under microgravity in the Japanese experimental module Kibo aboard the International Space Station ISS Also described are related topics such as onboard experimental apparatus executing procedures international collaborations preceding terrestrial studies and their many outcomes Further it presents insights into applications of capillarity to microelectromechanical systems MEMS micro total analysis systems TAS material processing and future human space exploration where surface tension must play a major role instead of gravity Intended as a pedagogical introduction for readers who are not familiar with this subject the book also skillfully reviews fundamental physics and analysis of thermocapillary convection describing phenomenology and theory of surface tension analysis of a transition threshold to unsteady flows and computational methods for flow and temperature fields It is thus a valuable resource for graduate students young researchers and engineers who are interested in related topics and enables them to quickly catch up with the latest research from basic to applied to thermofluid dynamics subject matter to microgravity science and technology *The International Conferences on Low Temperature Physics* Russell J. Donnelly,1993 **Journal of Thermophysics and Heat Transfer** ,2006 This journal is devoted to the advancement of the science and technology of thermophysics and heat transfer through the dissemination of original research papers disclosing new technical knowledge and exploratory developments and applications based on new knowledge It publishes papers that deal with the properties and mechanisms involved in thermal energy transfer and storage in gases liquids and solids or combinations thereof These studies include conductive convective and radiative modes alone or in combination and the effects of the environment **Proceedings of the 20th International Conference on Low Temperature Physics, LT-20** International Union of Pure and Applied Physics,American Physical Society,1994 *Physics Briefs* ,1994 **Proceedings of the 17th International Conference on Low Temperature Physics, LT-17** U.
