

# THE ULYSSES

MILLO SAYS "Wow!" when he gets his first glimpse of the Ulysses. The craft was designed by the Marine Industries, Inc., and built in secret at a new security dockyard. Its most striking feature is an enormous "bathysphere" at the front. This cleverly adjusts so that the bridge stays level, no matter how the submarine is diving or climbing. The Ulysses is a masterpiece of maritime engineering and is years ahead of the latest technology.

ON THE BRIDGE, Captain Rourke and his second officers control the craft's movements. The main console is a masterpiece of engineering. Speakerphones help the crew communicate with each other.

Hull contains 11 capsules on each side from where subjects are launched.

Cargo bay houses all other vehicles.

EACH member of the crew is assigned a bunk. They are not comfortable. The beds are built into the wall and people must share each bay room.

ONCE the preparations are complete, the Ulysses sets sail. Schools of fish watch as the huge submarine slowly begins its long journey to the bottom of the ocean.

## NAUTILUS

The Ulysses is inspired by the Nautilus, the famous submarine in 20,000 Leagues Under the Sea. Published in 1870, the classic tale was written by Jules Verne (1828-1905), a French writer. Verne wrote extraordinary adventure stories that transported the reader from the depths of the ocean to the center of the earth.

## UP AND UNDER

Like the Ulysses, modern submarines have two large tanks on each side called ballast tanks. These tanks control the depth that the sub comes up. When they fill with water, the sub goes deeper. When they empty, it surfaces. People work out the direction that the submarine should go by using a type of compass called a gyrocompass.
