 traditional jurisprudence is limited in scope for holding these systems legally accountable if they were to malfunction and  
 cause harm Interestingly within the judicial system itself the use of AIS is more prevalent now including within the criminal  
 justice system in some jurisdictions In the United States for instance AIS algorithms are utilized to determine sentencing and  
 bail processing Still jurists find themselves limited to traditional legal methodologies and tools when tackling novel situations  
 brought about by these systems For example traditional strict liability concept as applied in tort law typically ties  
 responsibility to the person s e g AIS developers influencing the decision making process In contract law particularly where  
 third parties are concerned AIS are equated to tools for the purposes of traditional strict liability rules Thus binding anyone
