Designing, Deploying, and Evaluating Virtual and Augmented Reality in Education Akcayir, Gokce, Demmans Epp, Carrie, 2020-10-23. Augmented reality (AR) and virtual reality (VR) provide flexibility in education and have become widely used for the promotion of multimedia learning. This use coincides with mobile devices becoming prevalent, VR devices becoming more affordable, and the creation of user-friendly software that allows the development of AR/VR applications by non-experts. However, because the integration of AR and VR into education is a fairly new practice that is only in its initial stage, these processes and outcomes need to be improved. *Designing, Deploying, and Evaluating Virtual and Augmented Reality in Education* is an essential research book that presents current practices and procedures from different technology implementation stages: design, deployment, and evaluation, to help educators use AR/VR applications in their own teaching practices. The book provides comprehensive information on AR and VR applications in different educational settings from various perspectives, including but not limited to mobile learning, formal/informal learning, and integration strategies with practical and/or theoretical implications. Barriers and challenges to their implementation that are currently faced by educators are also addressed. This book is ideal for academicians, instructors, curriculum designers, policymakers, instructional designers, researchers, education professionals, practitioners, and students.

Math and Literature Marilyn Burns, Stephanie Sheffield, 2004. Annotation: This series helps teachers use the imaginative ideas in children's books for math lessons. Organized into four grade-level collections to respond to teachers' specific classroom needs, this series includes favorite lessons based on a wide variety of children's books. Teachers will appreciate these books for the enjoyment and excitement they bring to math instruction. With introductions by Marilyn Burns, these books include vignettes of lessons and samples of student work. These lessons based on popular children's books address major mathematical topics such as addition, subtraction, multiplication, geometry, algebraic thinking, number sense, and place value.
