Felicity Cloake A superb culinary journey along Silk Roads less travelled. Jay Rayner This is the story of the world's most famous trade routes retold through recipes. In this rich and delicious cookbook, Iranian American cook and writer Anna Ansari takes us on a culinary historical and personal odyssey across the Silk Roads. Weaving together essays, family photography, and 90 recipes, Ansari brings life to the flavours of the Silk Roads from the walnut groves of her father's Iranian childhood across Central Asian markets brimming with fragrant melons and thronged with fat-tailed sheep and into the neighborhoods of modern-day Chinese cities. Discover delectable dishes from Baku to Beijing, Azeri Iranian stews served with crispy bottomed rice, dill-infused noodles from Western Uzbekistan, Georgian cornbread, Uyghur lamb chops, and all kinds of dumplings from fat-spiraled oromo to tiny stuffed dushbara in a delicate saffron broth. Non-Equilibrium States and Glass Transitions in Foods Bhesh Bhandari, Yrjö H. Roos, 2016-11-10 Non-equilibrium States and Glass Transitions in Foods: Processing Effects and Product Specific Implications presents the tactics needed to understand and control non-equilibrium states and glass transitions in food, an essential element in maintaining the shelf life and quality of foods. After brief introductory chapters introduce the science behind non-equilibrium states and glass transitions in foods, the book details how glass transition temperature is affected by composition and the ways it influences processability and physico-chemical changes during the storage of foods, also exploring how these effects can be controlled. The second section looks at individual foods, highlighting the implications of non-equilibrium states and glass transitions within these foods. Maintaining and improving the quality of food is of upmost importance to food companies who have to ensure that the shelf life of their products is as long as possible. A large amount of research has been performed into glass transitions in food over the last few years; however, there has not been a comprehensive review. This book fills that gap. Provides the only book on the market that covers non-equilibrium states and glass transitions in food from a practical standpoint. Presents food industry professionals in the area of food quality with essential information on the effects of glass transitions and non-equilibrium states on the shelf life of specific products. Edited by global leaders in glass transition.
