Chernobyl Alexey V. Yablokov, Vassily B. Nesterenko, Alexey V. Nesterenko, Janette D. Sherman-Nevinger, 2010-01-26 This volume written by leading authorities from Eastern Europe outlines the history of the health and environmental consequences of the Chernobyl disaster Although there has been much discussion concerning the impacts of nuclear accidents and Chernobyl in particular never before has there been a comprehensive presentation of all the available information concerning the health and environmental effects of the low dose radioactive contaminants that were emitted from the Chernobyl Nuclear Power Plant The official discussions emanating from the IAEA and associated UN agencies e.g. the Chernobyl Forum reports have largely downplayed or ignored many of the findings reported in the Eastern European

scientific literature and as a consequence these reports have erred on the side of negative findings simply because much of what was known was not included in their assessments This new book provides a complete and extensive summary of all known research including that published in Russian and Ukrainian and provides new insights to the likely long term health and environmental consequences of nuclear accidents NOTE Annals volumes are available for sale as individual books or as a journal For information on institutional journal subscriptions please visit www.blackwellpublishing.com/nyas ACADEMY MEMBERS Please contact the New York Academy of Sciences directly to place your order www.nyas.org Members of the New York Academy of Science receive full text access to the Annals online and discounts on print volumes Please visit <http://www.nyas.org/MemberCenter/Join.aspx> for more information about becoming a member **The World Factbook** ,2005
