Journal of Accounting Education James E. Rebele,2001 *A History of China in the 20th Century* Lü Peng,2023-08-14 This book provides readers with rich context and detailed description leading to new perspectives on major historical events in China Positioned as a thought leader and highly acclaimed arts professional in China the author is able to give a historical

account of China's twentieth century that is richly informed by its valent fields of political economy and cultural studies. Western readers' knowledge of China's twentieth century remains based on pioneering research of modern scholars such as Fairbank and Jonathan Spence. In recent years, however, it is rare to see a complete history of China spanning the nineteenth and twentieth centuries which also includes the first two decades of the twenty-first century. This book contributes new narrative and perspective to this span of history. Now, as the Sino-US trade conflict makes dramatic impact on a post-COVID global economy, readers have the need for a fresh understanding of how China came to be what it is today. The author's groundbreaking work provides new insight provided by newly uncovered sources explaining how China came to be what it is today from a cultural and sociological perspective in a historical mode.

Aspects of the Maritime Silk Road Ralph Kauz, 2010. In the recent years, trade, cultural exchange and transfer of knowledge in the Indian Ocean have come increasingly into the scope of various scholarly disciplines. The previous perception that the exploitation of this sea did only start with the European colonial expansion at the end of the 15th century had to be abandoned. The Europeans absorbed the long-existing structures rather than creating new ones. This concept of the Indian Ocean as a coherent space of transfer is also adopted in this volume. Some of the articles were presented at a conference held in Vienna while the others were supplied independently. The contributions are arranged around the two poles represented by the western and the eastern part of the Indian Ocean, especially Iran and China, but also other cultures and the manifold relations with the land-based Silk Road are discussed. The time frame ranges from the 14th to the 17th century.
