

Accounting Study Guide 8-9

Chapter 8

Inventory:

- Items held for sale in the ordinary business or goods to be used in the production of goods to be sold
- These accounts represent cost of goods that companies have on hand as of the measurement date
- The ending inventory from one period becomes the beginning balance of the next period

***All inventory Costs are first recorded in the inventory account and as they get sold the cost gets taken out of inventory (balance sheet) and into cost of goods sold (income statement)**

Merchandisers:

- One inventory account
- purchase merchandise in a form ready for sale

Manufacturers:

- three different accounts
 - Raw materials
 - Work in progress
 - Finished Goods
- All get added together for a total inventory account

Income Statement Presentation

Sales Revenue – Cost of Goods Sold = Gross Profit – Operating Expenses = Net Income from Operations

***Cost of Goods sold is the total inventory sold during the period**

***Period Costs are costs that are directly connected with bringing the goods to the buyer's place of business or converting raw materials to goods in salable condition**

Flow of Costs (Merchandiser):

Beginning Inventory + Cost of Goods Purchased = Cost of Goods Available for Sale – Cost of Goods Sold = Ending Inventory

Perpetual System (Merchandisers)

- 1. Purchases of merchandise are debited to inventory
- 2. Freight-in is debited to inventory
- 3. purchase returns and allowances, as well as purchase discounts are credited to inventory
- 4. Subsidiary records show quantity and cost of each type of inventory on hand
- This system provides continuous record of inventory and cost of goods sold—it is expensive to have

Period System (Merchandisers)

- 1. Beginning of the period, inventory has a beginning balance
- 2. Purchases of merchandise are debited to a **SEPARATE** purchase account
 - a. Returns are sent to a **SEPARATE** returns account
- 3. When the period ends, ending inventory gets determined by a physical count
- 4. Cost of Goods Sold gets calculated with a formula

***Beginning inventory + Purchases = Cost of Goods Available for Sale – Ending Inventory = Cost of Goods Sold**

- 5. The merchandiser makes journal entries to record the calculated Cost of Goods sold into the income statement and reflect the ending inventory from the physical count in the inventory account
- Everything has its own account → inventory, purchases, shipping, discounts and returns

materials and additional problems with solutions **Study Guide for Use with Financial Accounting** Robert Libby, Patricia A. Libby, Daniel G. Short, 2003 Libby Libby Short wrote this text based on their belief that the subject of financial accounting is inherently interesting but financial accounting textbooks are often not. They believe most financial accounting textbooks fail to demonstrate that accounting is an exciting field of study and one that is important to future careers in business. When writing this text they considered career relevance as their guide when selecting material and the need to engage the student as their guide to style, pedagogy and design. Libby Libby Short is the only financial accounting text to successfully implement a real world single focus company approach in every chapter. Students and instructors have responded very favorably to the use of focus companies and the real world financial statements. The companies chosen are engaging and the decision making focus shows the relevance of financial accounting regardless of whether or not the student has chosen to major in accounting.
