Life's Animal Shelter (LAS) is an animal adoption agency that strives to keep its expenses down and donations up and is mostly run by volunteers. LAS does not turn any animal away, and its goal is to find homes for all animals within six months of their arrival. Julie Friesel, one of the volunteers, has begun building a database for LAS. For this project, you work with her database, which currently has one table that contains information about the pets currently at LAS. Add one field into the table, edit field properties, enter data into records, modify the database layout, and sort and filter the data in the table.
