Rapid Urbanisation, Urban Food Deserts and Food Security in Africa Jonathan Crush, Jane Battersby, 2016-09-23 This book investigates food security and the implications of hyper urbanisation and rapid growth of urban populations in Africa By means of a series of case studies involving African cities of various sizes it argues that while the concept of food security holds value it needs to be reconfigured to fit the everyday realities and distinctive trajectory of urbanisation in the region The book goes on to discuss the urban context where food insecurity is more a problem of access and changing consumption patterns than of insufficient food production In closing it approaches food insecurity in Africa as an increasingly urban problem that requires different responses from those applied to rural populations

The State of African Cities, 2014 United Nations Publications,2015-09-10 The African continent is currently in the midst of simultaneously unfolding and highly significant demographic economic technological environmental urban and socio political transitions Africa s economic performance is promising with booming cities supporting growing middle classes and creating sizable consumer markets Despite significant overall growth the continent continues to suffer under very rapid urban growth accompanied by massive urban poverty and many other social problems These seem to indicate that the development trajectories followed by African nations since post independence may not be able to deliver on the aspirations of broad based human development and prosperity for all This report therefore argues for a bold re imagining of prevailing models in order to steer the ongoing transitions towards greater sustainability based on a thorough review of all available options That is especially the case since the already daunting urban challenges in Africa are now being exacerbated by the new vulnerabilities and threats associated with climate and environmental change

National AIDS Commission,2015 *Common Core Document Forming Part of the Reports of States Parties* ,2014 *Food and Nutrition Security in Southern African Cities* Bruce Frayne,Jonathan Crush,Cameron McCordic,2017-12-22 Urban population growth is extremely rapid across Africa and this book places urban food and nutrition security firmly on the development and policy agenda It shows that current efforts to address food poverty in Africa that focus entirely on small scale farmers to the exclusion of broader socio economic and infrastructural approaches are misplaced and will remain largely ineffective in ameliorating food and nutrition insecurity for the majority of Africans Using original data from the African Food Security Urban Network s AFSUN extensive database it is demonstrated that the primary food security challenge for urban households is access to food Already linked into global food systems and value chains Africa s supply of food is not necessarily in jeopardy Rather the widespread poverty and informal urban fabric that characterizes Africa s emerging cities impinge directly on households capacity to access food that is readily available Through the analysis of empirical data collected from 6 500 households in eleven cities in nine countries in Southern Africa the authors identify the complexity of factors and dynamics that create the circumstances of widespread food and nutrition insecurity under which urban citizens live They also provide useful policy approaches to address these conditions that currently thwart the latent development potential of Africa s expanding urban population **Yearbook of International Organizations 2014-2015 (Volume 3)** Union Of International Associations,Union of International Associations,2014-08-20 The Yearbook of
