*Landscapes in the 21st Century* Iris Guske, 2009-03-26 With contributions from scholars and practitioners in the fields of education literacy literature media communication and cultural studies from all five continents the present volume focuses on themes of pressing importance in today's globalized community. By giving voice to educators committed to excellence in teaching from primary school to university the book introduces the reader to a plurality of approaches to and applications of up to date theories in the fields of cognition language acquisition intercultural communication and technology based distance education to name but a few. Though situated in a concrete educational context be it a Chinese EFL classroom in transition an online MBA course offered in post Communist Romania or a US university utilizing community elders as a pedagogical tool each paper was selected on the universal value of its findings which professionals facing the challenges of 21st century pedagogy will find readily applicable in classrooms worldwide. Since teaching paradigms are strongly culture bound and influenced by national policies as much as international politics this book represents a maximum of diversity by including philosophical texts hands on research results and articles in the critical discourse tradition which reflect a number of contentious issues ranging from the pros and cons of dual language classrooms to potentially racist literature curricula and the intersection of politics and pedagogy in a post September 11 world. **Memoirs of a Black Philosopher** Richard A.
