It examines both the economic benefits and sociocultural impacts of tourism and argues that tourism sustainability depends on a delicate balance between economic and social cultural interests which could manifest differently among the stakeholders of various interests. It also explores through both theoretical and empirical analysis how travel connects people and places through the processes of tourist imagination and consumption. The volume portrays how contemporary discourses fuse with individual histories to formulate the ways in which tourists understand China. It will be a useful resource for students and scholars in human geography, tourism management, leisure and recreation and social sciences.

Dictionary Of British And Irish Botanists And Horticulturalists Including plant collectors, flower painters and garden designers

Ray Desmond,2020-12-23 Over the past four centuries botanists and gardeners in the British Isles have gathered, maintained and propagated many varying species of plants. Their work has been documented in innumerable books and articles which are often difficult to trace. The Dictionary of British and Irish Botanists and Horticulturalists represents a time saving reference source for those who wish to discover more about the lives and achievements of the horticulturalists listed. The dictionary's utility comes not only from indicating the major publications of the named authors but also the location of their herbaria and manuscripts. The previous 1977 edition of the Dictionary has for many years been a much used source of information for botanists, botanic artists and archivists. In this revised edition the scope has been expanded to include among its 13 000 entries flower painters in addition to botanical artists over 1400 entries and for the first time garden designers. Finally the Dictionary should have international appeal since so many botanists and gardeners worked on collective plants overseas in particular in North America and the British Commonwealth. Each entry gives wherever possible details of dates and places of birth and death, educational qualifications, professional posts, honours and awards, publications, location of plant collections, manuscripts, drawings and portraits. Its main function however is to provide further biographical references to books and periodicals. Comprehensive classified indices facilitate access by professions and activities, countries and plant interests.
