

Seafloor Spreading

Objectives:

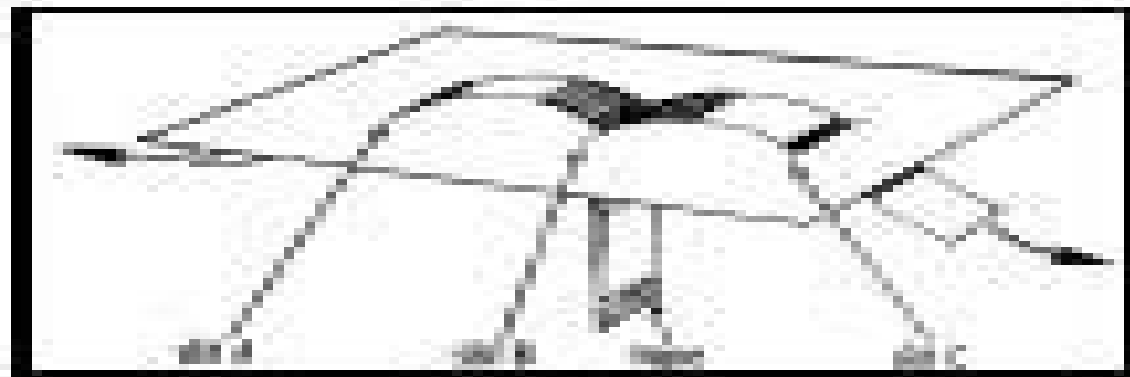

Along the mid-ocean ridges of the world, new ocean floor is being created. Although this process takes place continuously, it is difficult to observe directly. In the following activity, you will build a model to help understand this process.

Materials:

Colored Paper
Scissors
Tape

Procedure:

1. Cut along the dotted lines of the seafloor-spreading model pattern.
2. Cut the strips, indicated on the form strips with colored pencils.
3. Tape together the template made of the strips with the colorfastness through each strip.
4. Thread the form strips through Holes.
5. Pull one side down through Hole A, another side through Hole C.
6. Pull the strips through the slots, as that indicates where the fault ridges emerge from Hole B and disappear into Hole D and C at the spreading.
