**Dynamic Process Methodology in the Social and Developmental Sciences** Jaan Valsiner,Peter C. M.

Molenaar,Maria C.D.P. Lyra,Nandita Chaudhary,2009-07-09 All psychological processes like biological and social ones are dynamic Phenomena of nature society and the human psyche are context bound constantly changing and variable This feature of reality is often not recognized in the social sciences where we operate with averaged data and with homogeneous stereotypes and consider our consistency to be the cornerstone of rational being Yet we are all inconsistent in our actions within a day or from one day to the next and much of such inconsistency is of positive value for our survival and development Our inconsistent behaviors and thoughts may appear chaotic yet there is generality within this highly variable dynamic The task of scientific methodologies qualitative and quantitative is to find out what that generality is It is the aim of this handbook to bring into one framework various directions of construction of methodology of the dynamic processes that exist in the social sciences at the beginning of the 21st century This handbook is set up to bring together pertinent methodological scholarship from all over the world and equally from the quantitative and qualitative orientations to methodology In addition to consolidating the pertinent knowledge base for the purposes of its further growth this book serves the major educational role of bringing practitioners students researchers and professionals interested in applications the state of the art know how about how to think about extracting evidence from single cases and about the formal mathematical statistical tools to use for these purposes

**Interdisciplinary Handbook of the Person-Centered Approach** Jeffrey H. D. Cornelius-White,Renate

Motschnig-Pitrik, Michael Lux, 2013-06-04 This book examines the scientific contribution and increasing relevance of the Person Centered Approach PCA in psychotherapy. The direction taken in the book is to provide readers with a multidisciplinary and multi perspective view as well as practical applications. Beyond the more conventional psychotherapy applications client centered experimental emotion focused child centered motivational interviewing existential filial etc others have evolved including peace and conflict resolution work encounter and T groups nonviolent communication parent effectiveness training person centered planning for people with disabilities relationship enhancement methods learner centered education technology enhanced learning environments human relations leadership training etc. Simultaneously scientific disciplines were influenced by this perspective in less obvious ways. Hence the major contribution of this book is to identify and characterize the key bridges so far only partly recognized between the PCA and several other disciplines. Based on the results of the bridge building endeavor the editors will propose an initial formulation of the PCA as a meta theory. It is intended as a generic framework to solve complex social problems and to stimulate further research and development concerning the human species in relationship to its environment.

**Children's Books in Print, 2007**, 2006 *Meeting the Challenges to Measurement in an Era of Accountability* Henry Braun, 2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves. The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4-8. Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district. Comparatively little has been written about the measurement of achievement in the other grades and subjects. This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all. It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives. In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective. The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment. Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field.
