Dilemmas of Educational Ethics Meira Levinson, Jacob Fay, 2019-01-02

Educators and policy makers confront challenging questions of ethics justice and equity on a regular basis Should teachers retain a struggling student if it means she will most certainly drop out Should an assignment plan favor middle class families if it means strengthening the school system for all These everyday dilemmas are both utterly ordinary and immensely challenging yet there are few opportunities and resources to help educators think through the ethical issues at stake Drawing on research and methods developed in the Justice in Schools project at the Harvard Graduate School of Education Dilemmas of Educational Ethics introduces a new interdisciplinary approach to achieving practical wisdom in education one that honors the complexities inherent in educational decision making and encourages open discussion of the values and principles we should collectively be trying to realize in educational policy and practice At the heart of the book are six richly described realistic accounts of ethical dilemmas that have arisen in education in recent years paired with responses written by noted philosophers empirical researchers policy makers and practitioners including Pedro Noguera Howard Gardner Mary Pattillo Andres A Alonso Jamie Ahlberg Toby N Romer and Michael J Petrilli The editors illustrate how readers can use and adapt these cases and commentaries in schools and other settings in order to reach a difficult decision deepen their own understanding or to build teams around shared values
