Objectives

- Describe how the amounts of reactants and products change in a chemical system at equilibrium
- Identify three stresses that can change the equilibrium position of a chemical system
- Explain what the value of K_{eq} indicates about the position of equilibrium

Vocabulary

- reversible reaction
- chemical equilibrium
- equilibrium position
- Le Châtelier's principle
- equilibrium constant (K_{eq})

Key Equation

$$K_{eq} = \frac{[C]^c \times [D]^d}{[A]^a \times [B]^b}$$

When $aA + bB \rightleftharpoons cC + dD$

Part A Completion

Use this completion exercise to check your understanding of the concepts and terms that are introduced in this section. Each blank can be completed with a term, short phrase, or number.

1. A reversible reaction is one in which the reaction can proceed in both directions. The reaction is reversible if the reaction is reversible.

2. The equilibrium constant, K_{eq} , is a ratio of the concentrations of the products to the concentrations of the reactants, each raised to the power of its coefficient in the balanced chemical equation. The value of K_{eq} is constant for a given reaction at a given temperature.

Cell and Molecular Biology Gerald Karp, 2009-10-19 Karp continues to help biologists make important connections between key concepts and experimentation The sixth edition explores core concepts in considerable depth and presents experimental detail when it helps to explain and reinforce the concepts The majority of discussions have been modified to reflect the latest changes in the field The book also builds on its strong illustration program by opening each chapter with VIP art that serves as a visual summary for the chapter Over 60 new micrographs and computer derived images have been added to enhance the material Biologists benefit from these changes as they build their skills in making the connection

Enzyme Handbook 9 Dietmar Schomburg, Dörte Stephan, 2013-11-11 Recent progress on enzyme immobilisation enzyme production coenzyme re generation and enzyme engineering has opened up fascinating new fields for the potential application of enzymes in a large range of different areas As more progress in research and application of enzymes has been made the lack of an up to date overview of enzyme molecular properties has become more appar ent Therefore we started the development of an enzyme data information sys tem as part of protein design activities at GBF The present book Enzyme Hand book represents the printed version of this data bank In future a computer searchable version will be also available The enzymes in this Handbook are arranged according to the Enzyme Com mission list of enzymes Some 3000 different enzymes will be covered Fre quently enzymes with very different properties are included under the same EC number Although we intend to give a representative overview on the char acteristics and variability of each enzyme the Handbook is not a compendium The reader will have to go to the primary literature for more detailed information Naturally it is not possible to cover all the numerous literature references tor each enzyme for special enzymes up to 40000 if the data representation is to be concise as is intended Objective Question Bank in Chemistry B.K.
