George R. Tyler

2012 Direct Scope Economics Paper Grade 11:

What Went Wrong George R. Tyler, 2013-07-16 Something has gone seriously wrong with the American economy. The American economy has experienced considerable growth in the last 30 years. But virtually none of this growth has trickled down to the average American. Incomes have been flat since 1985. Inequality has grown and social mobility has dropped dramatically. Equally troubling, these policies have been devastating to both American productivity and our long term competitiveness. Many reasons for these failures have been proposed: Globalization, Union greed, Outsourcing. But none of these explanations can address the harsh truth that many countries around the world are dramatically outperforming the U.S. in delivering broad middle class prosperity. And this is despite the fact that these countries are more exposed than America to outsourcing and globalization and have much higher levels of union membership. In *What Went Wrong* George R. Tyler, a veteran of the World Bank and the Treasury Department, takes the reader through an objective and data rich examination of the American experience over the last 30 years. He provides a fascinating comparison between the America and the experience of the family capitalism countries: Australia, Austria, Belgium, Denmark, France, Germany, the Netherlands and Sweden. Over the last 30 years, they have outperformed the U.S. economy by the only metric that really matters: delivering better lives for their citizens. The policies adopted by the family capitalist countries aren't socialist or foreign. They are the same policies that made the U.S. economy of the 1950s and 1960s the strongest in the world. *What Went Wrong* describes exactly what went wrong with the American economy, how countries around the world have avoided these problems, and what we need to do to get back on the right track.

Measuring Regional Authority Liesbet Hooghe, Gary Marks, Arjan H. Schakel, Sara Niedzwiecki, Sandra Chapman Osterkatz, Sarah Shair-Rosenfield, 2016 This is the first of five ambitious volumes theorizing the structure of governance above and below the central state. This book is written for those interested in the character, causes, and consequences of governance within the state and for social scientists who take measurement seriously. The book sets out a measure of regional authority for 81 countries in North America, Europe, Latin America, Asia, and the Pacific from 1950 to 2010. Subnational authority is exercised by individual regions and this measure is the first that takes individual regions as the unit of analysis. On the premise that transparency is a fundamental virtue in measurement, the authors chart a new path in laying out their theoretical, conceptual, and scoring decisions before the reader. The book also provides summaries of regional governance in 81 countries for scholars and students alike. *Transformations in Governance* is a major new academic book series from Oxford University Press. It is designed to accommodate the impressive growth of research in comparative politics, international relations, public policy, federalism, environmental and urban studies, concerned with the dispersion of authority from central states up to supranational institutions, down to subnational governments, and sideways to public-private networks. It brings together work that significantly advances our understanding of the organization, causes, and consequences of multilevel and complex governance. The series is selective, containing annually a

small number of books of exceptionally high quality by leading and emerging scholars The series targets mainly single authored or co authored work but it is pluralistic in terms of disciplinary specialization research design method and geographical scope Case studies as well as comparative studies historical as well as contemporary studies and studies with a national regional or international focus are all central to its aims Authors use qualitative quantitative formal modeling or mixed methods A trade mark of the books is that they combine scholarly rigour with readable prose and an attractive production style The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina Chapel Hill and the VU Amsterdam and Walter Mattli of the University of Oxford
