Bootleg Homes of Frank Lloyd Wright, The: His Clandestine Work Revealed Bob Hartnett,2023 Uncover the secret Chicago laboratory of Frank Lloyd Wright's Prairie Style Before Frank Lloyd Wright officially launched America's most famous architectural career he was designing the building blocks of his legendary prairie style on the side In violation of his contract with his employers Adler and Sullivan Wright moonlighted as an independent architect from his Oak Park studio From 1892 through the spring of 1893 he experimented with the elements that would become his signature in houses in Chicago La Grange and Oak Park The full roster of these bootleg homes has remained a matter of mystery and debate Robert Hartnett seeks to provide the first definitive account of the hidden artifacts of Wright's storied legacy **Completing Your Qualitative Dissertation: A Road Map From Beginning to End** Linda Dale Bloomberg,Marie Volpe,2012-04-26

Graduate students often struggle with turning qualitative research projects into a master's thesis or doctoral dissertation because the research itself is inherently messy Completing Your Qualitative Dissertation A Roadmap From Beginning to End Second Edition helps address that challenge Linda Dale Bloomberg and Marie Volpe have distilled decades of experience of dissertation advisement and successful doctoral defenses into this highly practical reference for graduate students They focus on finding and articulating a clear research problem purpose and questions laying out a research design that will lead to gathering the right kind of data and support the right kind of analysis and writing up and defending the study To help they provide working tools an integrative summary discussion at the end of each chapter comprehensive checklists and an annotated bibliography in each chapter **Writing Embodiment in Victorian Microscopy** Meegan Kennedy,2024-12-02

Writing Embodiment in Victorian Microscopy examines a revolutionary period in microscopical technology and practice At first considered a mere toy by 1900 the microscope rivaled the railway and telegraph as an emblem of modernity and enjoyed an astonishing diversity of applications This technology could drive scientific debates on subjects like cell theory vitalism and bacteriology guide workers in classrooms laboratories and businesses and inspire a personal hobby or a mass entertainment Victorian microscopy productively cuts across the ostensibly separate domains of science religion commerce art education entertainment and domestic life Writing Embodiment reads nineteenth century microscopy across scientific literary religious and popular texts It argues that Victorian microscopists saw their vision and cognition as fully embodied experiences the images emerging through a material entanglement of bodies observer instrument apparatus object in a dynamic unstable system These ideas echo the work of physiological psychologists who proposed mind as a system of embodied distributed and dynamic processes shaped by automatic or unconscious reflex action attention mental training and fatigue Striving to

regulate this complex system microscopists circulated tropes of embodiment through the varied forms of nineteenth century print culture. They adapted existing concepts such as beauty, the sublime, natural theology and fairylands or coined new phrases such as many-sided comprehension to promote favored forms of embodiment and enculturate microscopy as a difficult but valuable pursuit. Beautiful Mechanism draws on important work in book history and periodical studies by emphasizing the circulation of these tropes in intermedial conversations across diverse print forms. Victorians understood wonder and skepticism not as incommensurate approaches to scientific observation but rather as complementary forms of embodiment. Romantic tropes of wonder solicit affective flows from observer to wriggling animalcule and back while skeptical realist tropes offer to train the reader's eye, hand, body and judgment and to formalize microscopical practice. Microscopical narratives may manipulate wonder and skepticism in productive tension or create virtual storyspaces that enlist the reader in virtual witnessing. These tropes shape every level of microscopical interest and proficiency. By analyzing their use and circulation, Writing Embodiment illuminates wider patterns of Victorian thought on embodiment, scientific practice and community.

Reflections on Irish Criminology Orla Lynch, Yasmine Ahmed, Helen Russell, Kevin Hosford, 2020-11-16. This book explores the development of the discipline of Criminology on the island of Ireland through conversations with leading criminologists. Adding depth and breadth to the understandings of this growing discipline, leading scholars discuss their personal journey to Criminology, their research areas, their theoretical influences and the impact of the discipline of Criminology on how we think about criminal justice in Ireland and beyond. Research topics include desistence, victims' rights, parole, policing and research methods. The book explores what influences framed the work of key thinkers in the area and how Criminology intersects with policy and practice within and beyond the criminological and criminal justice fields. It provides an insight into how the discipline has emerged as a discrete subject through a discussion of Ireland's key historical moments. It argues that Ireland's unique historical, cultural, political, social and economic arrangements and research about Ireland have much to offer the international field of Criminology. This volume also reflects

on future directions for Irish Criminology as well as sounding warnings to ensure the healthy development of the field as a discipline in its own right and as an interdisciplinary undertaking *Buyers' Guide and Industrial Directory of Chicago* Chicago Association of Commerce and Industry, 1914 **Foundation** Joseph G.
