

# NATURE VS NURTURE

Nature versus nurture is an ongoing debate about the degree to which human behaviour is determined by genetic inheritance (nature) or learned through interactions with the environment (nurture).

## NURTURE

Empiricists suggest behaviour is determined by the environment and personal experiences. They believe all human characteristics are a result of social and natural environmental forces that influence development from birth onwards.

**John B. Watson (1903)** conducted a case study on a child known as 'Little Albert' to see if it was possible to condition a child to fear a previously un-fearful object.

- Little Albert showed no fear response to any stimuli before the experiment.
- Little Albert was presented with a white rat. Each time he reached for it, a steel bar was hit. After seven repetitions, Albert reacted to the rat alone crying and quickly crawling away, without the bar being hit.
- The fear had been transferred to similar looking objects, including a rabbit and a fur coat.
- One month later, Albert continued to show fear reactions to all similar objects. This provided evidence that the environment can be manipulated to create a phobic response and behavioural change.

**Zimbardo (1973)** conducted the **Stanford Prison Experiment** to investigate the effect that roles and the environment can have on people's behaviour.

- 24 male students were randomly assigned to the role of 'prisoner' or 'guard'.
- A simulated prison was built in the basement of the psychology building at Stanford University.
- Guards were issued with uniforms, batons, whistles and handcuffs as symbols of control and power.
- As students settled into their roles, their behaviour was affected. Guards became aggressive and abusive. Prisoners became increasingly depressed and several experienced acute anxiety and the early stages of deep depression.
- The experiment had to be stopped after just six days.

**The Humanistic Approach** – explains how people's behaviour is influenced by their perception and understanding of the world.

**The Behaviourist Approach** – believes all behaviour is learned through a process of conditioning.

**The Social Approach** – explains how people's behaviour is influenced by the presence of others.

## PROBLEMS WITH THE NATURE VS NURTURE DEBATE

1. It is reductionist because it states that behaviour is solely caused by genetic factors or experience.
2. It is deterministic because nativists suggest that behaviour is determined by hereditary factors, and empiricists suggest that behaviour is the result of interactions with the environment.
3. It is difficult to control variables. For example, the similarities in twin studies could relate to how the twins were raised. All nurture influences cannot be listed.

## NATURE

Nativists suggest that behaviour is caused by innate characteristics that are inherited from our ancestors and form our genetic make-up. They believe genes programme all of our behaviours: some are present from birth, and others behaviour are pre-programmed to emerge in later life.

**Gottesman and Shields (1976)** reviewed twin and adoption studies to determine whether schizophrenia has a genetic link.

**Adoption studies** found an increased occurrence of schizophrenia in adopted children with a schizophrenic biological parent. Children fostered to schizophrenic parents and adoptive parents of schizophrenic children showed little evidence of schizophrenia. This indicates a significant genetic input into the onset of schizophrenia.

**Twin studies** found a higher concordance rate for schizophrenia in identical twins than non-identical twins. (A concordance rate is the probability that both individuals in a pair will have a certain characteristic given that one of the pair has that characteristic.) Importantly, there was a concordance rate of 58% in identical twins compared to 12% in non-identical twins.

**Plomin (1986)** found that the overall heritability of IQ in identical and non-identical twins was about 0.58, which means 58% of IQ was influenced by genetics. When only identical twins that lived apart were studied, the concordance rate increased to 0.74, which means they were 74% similar despite living in different environments. Genetic influence appears to be stronger than environmental influence.

**The Biological Approach** – explains behaviour in relation to the functioning of the brain and nervous systems.

## NATURE AND NURTURE INTERACTION

Psychologists generally agree that behaviour is a result of the interaction between nature and nurture.

People may contribute to their own environments.

An individual's characteristics may cause people to respond to him or her in a particular way. In turn, this may reinforce the individual's behaviour, tendencies and beliefs.

**Maguire et al. (2006)** conducted a study of taxi drivers and found that the structure of the brain can change as a result of environmental demands.

They studied structural MRI scans in a group of London taxi drivers to see if the hippocampus would change because of their high dependence on navigation skills. The posterior hippocampus, which stores a spatial representation of the environment, was larger in taxi drivers than in control participants who did not drive taxis. This indicates that the posterior hippocampus can expand significantly in people with high dependence on navigational skills.

Genes can be seen as setting the upper and lower limits for people's behaviour.

The environmental may determine where an individual's behaviour falls within these limits.

Hippocampus

**The Psychodynamic Approach** – takes both environmental and genetic factors into account. Freud claimed personality is the product of innate drives and childhood experiences.

**The Cognitive Approach** – focuses on the brain's cognitive abilities but recognises that behaviour is influenced by experiences.

**The Developmental Approach** – emphasises the importance of both nature and nurture in behavioural development.

Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing Nature Vs Nurture Psychology Paper books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for Nature Vs Nurture Psychology Paper books and manuals is Open Library.

Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, Nature Vs Nurture Psychology Paper books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of Nature Vs Nurture Psychology Paper books and manuals for download and embark on your journey of knowledge?
