It's a simple Faustian bargain consumers have made but one with enormous implications. It means that David Verklin, CEO of one of the world's largest ad buying companies and his clients, the world's largest advertisers, control what TV programs get aired, what magazines get published, and how Google and Yahoo stay in very healthy business. In "Watch This Listen Up Click Here", Verklin and Kanner expose the inner workings of the media marketing and advertising industries. Readers will learn why their favorite shows get cancelled, why Oprah gives away cars, and how money, people, politics, and new technologies are transforming TV, the Internet, radio, magazines, and other media. Americans consume every day. David Verklin, New York, NY, is CEO of Carat Americas, the world's largest independent media buying operation. He frequently speaks to executives in marketing, media, and management. Bernice Kanner died in 2006, was a marketing expert and author for 13 years of New York magazine's "On Madison Avenue" column.

Unlike the many textbooks on operations management, supply chain management, and process technology, this book weaves together these threads as they interact in manufacturing. It has five parts: Getting to Know Manufacturing, Fundamental concepts of manufacturing as an economic activity, from manufacturing strategy to forecasting market demand, Engineering the Factory, Physical design of factories and processes, the necessary infrastructure and technology for manufacturing, Making Information Flow, The central nervous system that triggers and responds to events occurring in production, Making Materials Flow, The logistics of manufacturing from materials handling inside the factory via warehousing to supply chain management, Enhancing Performance, Managing manufacturing performance and methods to maintain and improve it both in times of normal operations and emergencies. Supported with rich illustrations and teaching aids, Introduction to Manufacturing is essential reading for industrial engineering and management students of all ages and backgrounds engaged in the vital task of making the things we all use.
