The Geography of South Africa Jasper Knight, Christian M. Rogerson, 2018-10-03 This edited collection examines contemporary directions in geographical research on South Africa It encompasses a cross section of selected themes of critical importance not only to the discipline of Geography in South Africa but also of relevance to other areas of the Global South All chapters are original contributions providing a state of the art research baseline on key themes in physical human and environmental geography and in understanding the changing geographical landscapes of modern South Africa These contributions set the scene for an understanding of the relationships between modern South Africa and the wider contemporary world including issues of sustainable development and growth in the Global South **Sustainable**

Education and Development—Clean Energy Clinton Aigbavboa, Wellington Thwala, Joseph N. Mojekwu, Lawrence Atepor, Emmanuel Adinyira, Gabriel Nani, Emmanuel Bamfo-Agyei, 2025-02-07 This book is Volume 1 of the proceedings of 2023 Sustainable Education and Development Research Conference This volume concentrates on papers in the area of clean energy Despite considerable progress more than 700 million people worldwide still lack access to electricity and around 2.4 billion people continue to use harmful and polluting fuels for cooking While efforts have been made to promote renewable energy and energy efficiency they have not been fast enough to achieve Sustainable Development Goal 7 Adding to the challenge the ongoing war in Ukraine has contributed to rising global energy prices and heightened energy insecurity in Europe In response to the energy crisis some European countries are planning to accelerate the transition to renewables and increase investments in clean energy and energy efficiency However others are considering a resurgence of coal which poses a risk to the overall green transition Between 2010 and 2020 the percentage of the global population with access to electricity increased from 83% to 91% with 1.3 billion people gaining access Nevertheless this leaves approximately 733 million people still without electricity and most of them reside in sub Saharan Africa Achieving universal access by 2030 the annual growth rate in access needs to accelerate from 0.5 percentage points to 0.9 percentage points necessitating significant efforts in low income fragile and conflict affected countries In 2020 69% of the global population had access to clean cooking fuels and technologies While more than half of those without access to clean cooking fuels live in Asia the 20 countries with the lowest percentage of people having access to clean cooking were predominantly least developed countries in Africa The share of renewable sources in total final energy consumption reached 17.7% globally in 2019 just slightly higher than the figure for 2015 The electricity sector leads in the adoption of renewables accounting for 26.2% of total final energy consumption in 2019 while the heat and transport sectors have made limited progress Global primary energy intensity defined as global total energy supply per unit of GDP improved from 5.6 megajoules per dollar 2017 purchasing power parity in 2010 to 4.7 megajoules in 2019 However the rate of improvement 1.6% per year on average since 2015 falls short of the 3.2% annual rate needed to reach Sustainable Development Goal 7.3 International financial flows to support

clean and renewable energy in developing countries reached 10.9 billion in 2019, a 23.6% decrease from 2018. This decline occurred even before the onset of the COVID-19 pandemic. Over a longer five-year moving average, average annual commitments decreased for the first time since 2008 from 17.5 billion in 2014 to 16.6 billion in 2015. Although developing countries achieved a record of 245.7 watts per capita in installed renewable energy generating capacity in 2020, small island developing States, least developed countries, and landlocked developing countries have lagged behind. It would take least developed countries and landlocked developing countries nearly 40 years and small island developing States almost 15 years to reach the same level of progress as the average developing country in 2020. The 2023 SEDRC conference titled Sustainable Development and Education aims to redefine the understanding of research in the continent's development and the role of researchers. The conference focusses on applied research discussions and its dissemination. Researchers from research institutions, academicians, postgraduate students, politicians, and industry representatives will be the primary audience for the conference proceedings.

Beyond Tenderpreneurship MISTRA, 2020-04-16

Black Economic Empowerment (BEE) policies have been a central pillar of attempts to overcome the economic legacy of apartheid. Yet more than two decades into democracy, economic exclusion in South Africa still largely reflects the fault lines of the apartheid era. Current discourse often conflates BEE with the so-called tenderpreneurship referred to in the title, namely the reliance of some emergent black capitalists on state patronage. Authors go beyond this notion to understand BEE's role from a unique perspective. They trace the history of black entrepreneurship and how deliberate policies under colonialism and its apartheid variant sought to suppress this impulse. In the context of modern South Africa, authors interrogate the complex dynamics of class formation, economic empowerment, and redress against the backdrop of broader macroeconomic policies. They examine questions relating to whether B-BBEE policies are informed by strategies to change the structure of the economy. These issues are explored against the backdrop of the experiences of other developing countries and their journeys of industrialisation. The relevant black empowerment experiences of countries such as the United States are also discussed. The authors identify policy and programmatic interventions to forge the non-racial future that the constitution enjoins South Africans to build.

Food and Nutrition Systems in Urban India Neetu Choudhary, 2023-12-18

This book explores identity-mediated dynamics of food and nutrition entitlement in urban India, analysing concerns around equity access to food and public health. The issues of disempowerment and identity dynamics when it comes to nutrition and health are more intricate in the urban context due to a greater population and cultural diversity. While in the global north, urban food planning is increasingly dependent on local government, in developing countries, urban nutrition is yet to be considered a serious policy issue. This

book with a disaggregated analysis for urban India and an in depth case study of Mumbai examines how malnutrition in India is becoming an urban challenge It discusses how far caste religion and migratory identities serve as a source of deprivation and analyses the role of local governance particularly municipal governance and urban planning in facilitating the disentanglement It also offers suggestions for the global south to reverse the stark inequality in its urban centres and address nutrition challenges by developing their own sustainable and resilient food systems This book is an essential read for scholars and researchers of public health nutrition urban sociology urban planning development studies political sociology public policy and political studies **Papers** Historical Association of Kenya Annual Conference,1976 Wrecking Ball Stu

Woolman,2021-04-29 Wrecking Ball explores in an unprecedented manner a decalogue of wicked problems that confronts humanity Nuclear proliferation climate change pandemics permanent technological unemployment Orwellian public and private surveillance social media that distorts reality cyberwarfare the fragmentation of democracies the inability of nations to cabin private power the failure of multinational institutions to promote collaboration and the deepening of autocratic rule in countries that have never known anything but extractive institutions Collectively or even severally these wicked problems constitute crises that could end civilisation Does this list frighten you or do you blithely assume that tomorrow will be just like yesterday Wrecking Ball shows that without an inclusive system of global governance the collective action required to solve those wicked problems falls beyond the remit of the world's 20 inclusive democracies 50 flawed democracies and 130 extractive elitist autocracies Flawed democracies and autocracies that already struggle to produce goods necessary for their own citizens to flourish are simply incapable of committing to international arrangements that address the existential threats posed by the decalogue of wicked problems This then is our children's inheritance Dystopias far far worse than the polities that we ourselves have known What if anything can mitigate the harms that are our legacy Wrecking Ball offers as an answer a ground breaking analysis of South Africa's political economy It demonstrates that this country's elitist and extractive political and economic institutions not only make resolution of ongoing domestic crises unattainable likewise they make meaningful responses to wicked problems impossible Smart people think they have all the answers Without laboring under any such illusions Martin Luther King Jr eloquently opined The arc of the moral universe is long but it bends towards justice But what will happen King would acidly ask if we continue to dawdle and simply run out of time Wrecking Ball similarly operates under no such smart pretenses and undeterred and unmatched ventures into terrains traversed by truly great political economists Smith Ricardo Marx and Keynes By knitting together what we all know to be the facts with cutting edge theory in economics sociology history and political science the book paints an unflinching portrait of where we are and where we are headed Are we ready to be honest with ourselves about the likely future of this overheated overpopulated planet
