

CONTINUOUS FIRE PROTECTION
The continuous fire protection system is a system of interconnected components that are designed to detect and respond to a fire. The system consists of a fire detection system, a fire alarm system, and a fire suppression system. The fire detection system is responsible for detecting a fire and sending a signal to the fire alarm system. The fire alarm system is responsible for alerting the occupants of the building and activating the fire suppression system. The fire suppression system is responsible for extinguishing the fire. The continuous fire protection system is designed to provide a high level of protection for the building and its occupants.
