Normativity, Meaning and Philosophy: Essays on Wittgenstein Hans-Johann

Glock, 2024-04-09 This is a collection of essays on Wittgenstein and Wittgensteinian themes that appeared between 1996 and 2019. It is divided into three parts with a common trajectory laid out in a substantial introduction. The first part links meaning, necessity and normativity. It defends and modifies Wittgenstein's claim that the idea of a grammatical rule holds the key to understanding linguistic meaning and its connection to necessary truth. The second part elucidates the connections between meaning concepts and thought in Wittgenstein and beyond. It shows how he laid the grounds for a sound understanding of four contested issues: radical interpretation, concepts, nonsense and animal minds. The third part provides a qualified defence of Wittgenstein's controversial idea that philosophical problems are conceptual and thereby rooted in confusions concerning the meanings of and semantic relations between linguistic expressions. Against irrationalist interpretations, it demonstrates that Wittgenstein's method is argumentative rather than therapeutic. The collection as a whole makes a powerful case for an analytic perspective on Wittgenstein. The essays bring out the abiding relevance of Wittgenstein's reflections to contemporary debates on central topics such as the role of normativity, the foundations of linguistic meaning, the nature of concepts, the possibility of animal thought and the proper methods of philosophy.

The Animal Mind Kristin Andrews, 2014-10-30 The study of animal cognition raises profound questions about the minds of animals and philosophy of mind itself. Aristotle argued that humans are the only animal to laugh, but in recent experiments, rats have also been shown to laugh. In other experiments, dogs have been shown to respond appropriately to over two hundred words in human language. In this introduction to the philosophy of animal minds, Kristin Andrews introduces and assesses the essential topics, problems, and debates as they cut across animal cognition and philosophy of mind. She addresses the following key topics: what is cognition and what is it to have a mind? What questions should we ask to determine whether behaviour has a cognitive basis? the science of animal minds explained: ethology, behaviourist psychology, and cognitive ethology; rationality in animals; animal consciousness; what does research into pain and the emotions reveal? What can empirical evidence about animal behaviour tell us about philosophical theories of consciousness? Does animal cognition involve belief and concepts? Do animals have a Language of Thought? animal communication: other minds; do animals attribute mindedness to other creatures? moral reasoning and ethical behaviour in animals; animal cognition and memory. Extensive use of empirical examples and case studies is made throughout the book. These include Cheney and Seyfarth's vervet monkey research, Thorndike's cat puzzle boxes, Jensen's research into humans and chimpanzees, and the ultimatum game. Pankseep and Burgdorf's research on rat laughter, and Clayton and Emery's research on memory in scrub jays. Additional features such as chapter summaries, annotated further reading, and a glossary.
