**The China Boom** Ho-fung Hung, 2015-10-20 Many thought China's rise would fundamentally remake the global order Yet much like other developing nations the Chinese state now finds itself in a status quo characterized by free trade and American domination Through a cutting edge historical sociological and political analysis Ho-fung Hung details the competing interests and economic realities that temper the dream of Chinese supremacy forces that are stymieing growth throughout the global South Hung focuses on four common misconceptions that China could undermine orthodoxy by offering an alternative model of growth that China is radically altering power relations between the East and the West that China is capable of diminishing the global power of the United States and that the Chinese economy would restore the world's wealth after the 2008 financial crisis His work reveals how much China depends on the existing order and how the interests of the Chinese elites maintain these ties Through its perpetuation of the dollar standard and its addiction to U.S. Treasury bonds China remains bound to the terms of its own prosperity and its economic practices of exploiting debt bubbles are destined to fail Hung ultimately warns of a postmiracle China that will grow increasingly assertive in attitude while remaining constrained in capability

**Marxism and Real Estate Development** Julian Roche, 2023-09-01

This book straddles two worlds and attempts to bring them together that of Lefebvre s Marxism on the one hand and that of real estate development on the other Lefebvre has now become a household name amongst many contemporary Marxists especially those with an interest in urban planning and certain quarters of the architectural profession however his work is far less well known by real estate professionals whether investors developers brokers or indeed policymakers Marxism and Real Estate Taking Lefebvre Seriously has both a large scope and a very bold aim to use an explication and analysis of the work of Henri Lefebvre not only to present a critique of development but also to draw these two worlds together It therefore first aims to present the arguments of this increasingly well known French Marxist philosopher sociologist and pioneer of urban studies second to situate contemporary real estate development in the light of Lefebvre s work and third to analyse the potential application of Lefebvre s work to each of the major components of contemporary real estate to use Lefebvre s work in order to recommend practical action for developers working alongside planners and architects to influence the future of global real estate As well as its direction at developers themselves this book should be of interest to economists real estate researchers and professionals planners urban studies scholars and of course to those interested in the application of Lefebvre s work to real estate

**Devolution and the UK Economy** David Bailey, Leslie Budd, 2016-02-24 The Scottish Referendum in September 2014 had significant and far reaching consequences for the political settlement of the United Kingdom The pressure for more fiscal devolution and other economic powers in the devolved nations has increased demands for greater economic decentralisation in the regions and sub regions of England

This edited collection constructs an analytical narrative that draws on the evidence of the Scottish experience and expert testimony from the Smith Commission and other policy advisors. Drawing on ideas from fiscal federalism and agglomeration economics, the contributors examine the reorganisation and restructuring of economic territories within the UK. What is apparent in the UK experience of asymmetrical devolution is that many of the complex issues surrounding decentralised economic governance are not going to be addressed through simple expedients. The pertinent question is what should be the appropriate institutional logics and formal policy bailiwicks underpinning a new constitutional settlement. In other words, what new governmental powers and accompanying forms of governance are needed to achieve a more economically and spatially balanced economy.
