Advances in Research on Reading Recovery Jerome V. D'Agostino, 2018-12-07 There is no shortage of innovative educational programs the challenge is learning how to scale and sustain those with strong evidence of effectiveness This book focuses on Reading Recovery one of the few educational innovations that has successfully expanded and established itself in several educational systems in the world Developed by Marie Clay in New Zealand during the mid 1980s Reading Recovery is an intensive intervention for young students who are struggling to learn how to read and has expanded to several countries across the globe over the last 30 years Providing evidence of the intervention's effectiveness both in the short and long term this volume presents in depth studies to elucidate why the program is effective discusses the trials and tribulations in scaling and sustaining the program and approaches scaling and maintaining from theoretical and practical perspectives The contributors to this book explain how Reading Recovery has established itself because it has maintained a strong focus on evidence developed a deep sense of community among its practitioners and was at the forefront in enhancing professional development of the teachers who delivered the intervention Understanding the implementation experiences of the intervention is beneficial for any innovation developer who wishes to grow and sustain an intervention The chapters in this book were originally published as articles in the *Journal of Education for Students Placed At Risk*

[The Oxford Handbook of Assessment Policy and Practice in Music Education, Volume 2](#) Timothy Brophy, 2019-01-02 In the music classroom instructors who hope to receive aid are required to provide data on their classroom programs Due to the lack of reliable valid large scale assessments of student achievement in music however music educators in schools that accept funds face a considerable challenge in finding a way to measure student learning in their classrooms From Australia to Taiwan to the Netherlands music teachers experience similar struggles in the quest for a definitive assessment resource that can be used by both music educators and researchers In this two volume Handbook contributors from across the globe come together to provide an authority on the assessment measurement and evaluation of student learning in music The Handbook's first volume emphasizes international and theoretical perspectives on music education assessment in the major world regions This volume also looks at technical aspects of measurement in music and outlines situations where theoretical foundations can be applied to the development of tests in music The Handbook's second volume offers a series of practical and US focused approaches to music education assessment Chapters address assessment in different types of US classrooms how to assess specific skills or requirements and how assessment can be used in tertiary and music teacher education classrooms Together both volumes of *The Oxford Handbook of Assessment in Music Education* pave the way forward for music educators and researchers in the field

[Handbook of Research on Teaching](#) Drew Gitomer, Courtney Bell, 2016-05-19 The Fifth Edition of the *Handbook of Research on Teaching* is an essential resource for students and scholars dedicated to the study of teaching and learning This volume offers a vast array of topics ranging from the history of teaching to technological and literacy issues

In each authoritative chapter the authors summarize the state of the field while providing conceptual overviews of critical topics related to research on teaching. Each of the volume's 23 chapters is a canonical piece that will serve as a reference tool for the field. The Handbook provides readers with an unparalleled view of the current state of research on teaching across its multiple facets and related fields. [Imputation Methods for Missing Hydrometeorological Data Estimation](#)

Ramesh S.V. Teegavarapu, 2024-07-20. Missing data is a ubiquitous problem that plagues many hydrometeorological datasets. Objective and robust spatial and temporal imputation methods are needed to estimate missing data and create error free gap free and chronologically continuous data. This book is a comprehensive guide and reference for basic and advanced interpolation and data driven methods for imputing missing hydrometeorological data. The book provides detailed insights into different imputation methods such as spatial and temporal interpolation, universal function approximation and data mining assisted imputation methods. It also introduces innovative spatial deterministic and stochastic methods focusing on the objective selection of control points and optimal spatial interpolation. The book also extensively covers emerging machine learning techniques that can be used in spatial and temporal interpolation schemes and error and performance measures for assessing interpolation methods and validating imputed data. The book demonstrates practical applications of these methods to real world hydrometeorological data. It will cater to the needs of a broad spectrum of audiences from graduate students and researchers in climatology and hydrological and earth sciences to water engineering professionals from governmental agencies and private entities involved in the processing and use of hydrometeorological and climatological data.
