## 2012 Bimco Isf Manpower Study:

*The World of the Seafarer* Victor Oyaro Gekara, Helen Sampson, 2020-12-03 This open access book constitutes an ethnographic mosaic which depicts the contextual complexities of the life and work of seafarers who are employed in the international merchant cargo fleet. The collection is based upon the observations and interviews of researchers in multiple disciplines. It is woven together to offer a richly detailed insight into the ways in which a complex global industry operates internationally. The book covers issues to do with career decisions and recruitment, gender, life and work on board multinational vessels, health and safety issues, the regulation of the industry, shipboard roles and role conflict, and the representation of workers. It will be of considerable interest to all students globally who are studying for professional seafaring qualifications, to graduate students studying for masters courses in ship and port management and to welfare professionals and policy makers. It is of special interest to those connected to the shipping industry who specialize in issues relating to the human element and will serve as a paradigm defining text in this area.

**Lives in Peril** D. Walters, N. Bailey, 2013-09-30 *Lives in Peril* demonstrates how and why seafarers are a vulnerable group of workers. It argues they are made so by the organisation and structure of their employment, the prioritisation of profit over safety by the actors that engage and control their labour, the limits of enforcement of the regulatory framework that is in place to protect them and by their weakness as collective actors in relation to capital. The consequences of this vulnerability are seen in data on their occupationally related morbidity and mortality, evidence that probably only represents a partial picture of the actual extent of the physical, mental and emotional harm resulting from work at sea. This volume's central argument is that this situation is likely to remain broadly unchanged as long as global maritime governance and regulation remains in thrall to the neo-liberal economic and political arguments that drive globalisation and fails to enforce regulatory standards more robustly.

**Human Resource Management in Shipping** Lijun Tang, Pengfei Zhang, 2021-03-14 This book sheds light on the nature and causes of the issues and challenges in human resources in shipping and proposes fresh recommendations to manage them. It explains the multiple forces at play including the global regulatory regime, national institutional frameworks, industrial practices, trade union responses and pressures from customers and non-governmental organisations. *Human Resource Management in Shipping* integrates seafarer employment data released by national maritime authorities and a large body of literature that discusses discrete human resources issues in shipping into a single volume, providing readers with a comprehensive understanding of the issues and challenges within human resources in shipping. Beyond this, the book also offers a fresh perspective on some of the long lasting HRM challenges in the industry such as skills shortage and seafarer recruitment and retention. This book aims to provide readers with systematic and in-depth knowledge of human resource management in shipping and offers researchers a valuable source of reference and a solid foundation on which further development can be built.

*Seafarers' Rights in China* Pengfei Zhang, 2016-09-15 This book critically investigates

the conditions of seafarers rights in China in legislation and in practice focusing in particular on the restructuring process following the 2006 Maritime Labour Convention Accordingly it poses key research questions to major Chinese stakeholders to gauge their responses to the Convention to determine whether the protection of Chinese seafarers has actually improved since the advent of the Convention and further to identify the continuing challenges for future improvement The Convention will enter into force in China in November 2016 bringing with it significant changes
